

Alaska Educational Innovations Network (AEIN)

AEIN Student Success Outcomes

Each and every student will:

- ... frame his/her questions for inquiry/investigation and then access, gather, and analyze information from multiple sources (e.g. books, internet, people) to develop answers to the questions as well as pose new questions.
- ... define and inter-relate values, needs, and wants in order to identify goals, develop plans, and implement the plans to meet the goals.
- ... make well-informed decisions by analyzing evidence, discerning fact from opinion, asking critical questions, and thinking creatively about issues.
- ... know him/herself, personal frames of reference, areas of strength, and areas for growth, and is secure within his/her world and unique heritage.
