Alaska Department of Labor predicts a 14.7 percent growth in construction and demand for 364 construction manager positions between 2012 and 2022.

Construction industry offers a wide range of career opportunities beyond construction manager. Graduates enter construction workforce as cost estimators, project schedulers, project engineers, construction superintendents, quality control managers, safety managers, procurement specialists and many more.

- Strongly supported by local construction industry
- Fully accredited by the American Council for Construction Education
- Poised to offer Alaska’s unique arctic cold weather and remote site construction expertise
- Industry would like UAA to create graduate degree and minor in construction management

- More students than available work-based learning opportunities
- Program demand has outpaced classroom space
- Upper division students outpace available courses
