FACULTY MINIGRANT PROPOSALS FOR "GENERAL PURPOSE" GER INTEGRATIVE CAPSTONE COURSES, 2007-2008

DEADLINE FOR SUBMISSION: May 23, 2007

Minigrants for \$1,000.00 per course are available to full-time UAA faculty members to develop proposals during Summer 2007 for "General Purpose" courses for the Integrative Capstone category of the UAA GER for the graduating Baccalaureate students without a defined capstone course in their major/program. All capstone courses require completion of the 12 credits of Tier 1 College-Level Basic Skills, and typically Junior Standing, but "General Purpose" capstones are defined as those for which with any additional required prerequisites are met by general completion of GER Tier 2 category(ies) or completion of Tier 2 courses commonly taken by large numbers of baccalaureate students. Proposals must address the curricular requirements detailed in the attached Integrative Capstone Curriculum Model and Assessment Criteria (attachment 2). The criteria used to evaluate the Integrative Capstone proposals are detailed on the following page.

Name(s): _____ **Phone:** _____ **Email:** _____

Department: _____ **Location:** _____

Course Number and Title: _____

This is a: **new course** **revised course**

This proposal should follow the outline of a course content guide. Though it need not be fully developed, it should include enough detail to allow evaluation of your proposal and assessment of the potential for the course to (1) meet the requirements of the integrative capstone category, (2) be meaningful, attractive and accessible to students in a number of majors, and (3) to provide opportunity for assessment of a number of GER outcomes including knowledge integration.

If the proposal is funded, you agree:

- To submit the course through the normal curriculum review process (department, college, and university wide peer-review) in Fall 2007;
- To submit the course proposal with appropriate CARs and CCGs attached so that it arrives at the appropriate School/ College Curriculum Review Committee no later that 1 October 2007;
- To accept an assignment, if offered by your dean or director, to instruct the course for the first time between Fall 2008 and Spring 2009;
- To implement the course assessments described in the proposal;
- To participate in GER Integrative Capstone assessment activities; and
- To write an assessment report after the course has been delivered two semesters for the GER Committee detailing student achievement in the Integrative Capstone course.

Faculty Signature(s)

Date

*If you have any questions about the Integrative Capstone or preparing the proposal, contact Caedmon Liburd, Chair of UAB at 786-4364 or afcal@uaa.alaska.edu
Please submit your proposal with cover sheet to the UAA Governance Office electronically as email attachments to aygov@uaa.alaska.edu by Wednesday, May 23rd 2007.*

FACULTY MINIGRANT PROPOSALS FOR “GENERAL PURPOSE” GER INTEGRATIVE CAPSTONE COURSES, 2007-2008

DEADLINE FOR SUBMISSION: May 23, 2007

Please review the following instructions as you develop your minigrant proposal for a GER Integrative Capstone course. The following format indicates what the proposal should address, but it need not be adhered to literally. First, read carefully the Integrative Capstone Curriculum Model and Assessment Criteria (attachment 2), and in a write-up not to exceed five double spaced pages, please indicate the following.

Suggested Format

1. Course Number and Title
2. Course Description (as it might appear in the catalog)
 - Consider a thematic focus dealing with the emerging 21st century (such as the forces of globalization and diversity; scientific, social, and technological change)
3. Course Narrative (what you want the course to achieve)
 - What is your intent in the course?
 - How does it meet the upper-division requirements (course level justification) for Integrative Capstone courses?
 - How does it meet the intent of the Integrative Capstone model?
 - How does it address GER Basic College-Level Skills (Tier 1) and Disciplinary Area (Tier 2) integration?
 - How are the required prerequisite(s), course content, and course activities consistent with providing access to students in a variety of majors and programs?
 - How has the course content been designed to satisfy integrative capstone requirements in the context of appealing to the interests of a variety of students with different disciplinary backgrounds?
 - Describe any other significant aspects of the course.
4. Course Instructional Goals and Student Outcomes
 - Knowledge Integration and at least 3 out of the 4 instructional goals and student outcomes (see Curriculum Model and Assessment Criteria, section 5.0)
 - List and describe any other course-specific instructional goals and student outcomes the course will engage.
5. Course Assessment Strategies (Knowledge Integration and at least 2 out of the 4 detailed above, see Curriculum Model, Section 6.0)
 - For each Instructional Goal and Student Outcome, describe how you will assess student achievement in each of those areas.
 - What specific assignments will students be asked to complete to demonstrate their achievement in the course?
 - What specific student artifacts will be created to document student achievement in the course?
6. Additional Material
 - Please feel free to include any other information that will assist the review committee in assessing the potential of your proposal for the Integrative Capstone category.

The GER Summer Working Group will use the following criteria to review your proposal:

The course proposal addresses the requirement:	Strongly Agree	Agree	Undecided	Disagree	Strongly Disagree
1. Knowledge Integration is incorporated as part of the course design					
2. Knowledge Integration is specifically addressed as part of outcomes assessment					
3. At least 3 out 4 other Instructional Goals and Student Outcomes are part of the course design					
• Effective Communication					
• Critical Thinking					
• Information Literacy					
• Quantitative Perspectives					
4. (Performance in Knowledge Integration and at least 2 of the other chosen Instructional Goals and Student Outcomes referenced in 3 are assessed)					
5. Generates student artifacts that demonstrate achievement in the student outcomes
