VIII. Old Business

IX. New Business

X. Informational Items and Adjournment

A. Credit Hour Review Process: In response to a new NWCCU policy on credit hours, an AY14 subcommittee of the UAB and GAB recommended a process to review class scheduling practices relative to approved CAR/CCG credit hours. In Fall 2014 UAA ran a pilot, which focused on traditional face-to-face offerings. After filtering for apparent face-to-face delivery, a total of 143 course sections were sent to the colleges for review.

Findings and Actions: Most of the courses integrated nontraditional components, such as a practicum or 0-credit lab, and were found to be in compliance. Sixteen sections were rescheduled to meet the required contact hours. Departments will revise the curriculum documents for nine courses in order to reflect current practice.

II. Approval of the Agenda (pg. 1)
Remove item C (GELO Motion) under new business as it is still under review by the GERC
Approved as amended

III. Approval of Meeting Summary (pg. 2-4)
Approved

IV. Administrative Report
A. Vice Provost for Undergraduate Academic Affairs Susan Kalina
Written report is posted on the agenda website
Post-Bac certificate in Speech Pathology was approved by BOR

B. University Registrar Lora Volden
Continuing to work on the workflow process for CIM

V. Chair’s Report
A. UAB Chair- Francisco Miranda

B. GERC
Approved ANTH A464 and STAT A253
Approved the GERC 14-15 goals
Approved the workflow motion whereas all GER courses will be reviewed by the GERC first before being reviewed by the UAB
Approved the General Course Requirements for AA and AAS written communication Skills English A111

VI. Program/Course Action Request- Second Readings
Add ANTH A464 Culture and Globalization (GER)(stacked with ANTH A664)
(3 cr)(3+0)(pg. 5-13)
Unanimously Approved

Unanimously Approved

VII. Program/Course Action Request- First Readings

VIII. Old Business

IX. New Business
A. UAB Goals for 2014-2015 Academic Year (pg. 20)
Approved the goals with minor edits
B. **Motion:** After reviewing the workflow for GER courses, the eCurriculum Workflow subcommittee proposes that all GER courses be reviewed by the General Education Committee (GERC) first, before being reviewed by the Undergraduate Academic Board (UAB). This changes the current process of having the courses be reviewed by UAB before and after going to the GERC.

**Justification:** This shift will allow for a more efficient workflow process in the eCurriculum software (CIM) and avoid unnecessary delays in approval.

*Unanimously Approved*

C. GELO Outcomes motion reconsidered as catalog copy change (pg. 21)

D. General Course Requirements for AA and AAS written communication Skills English A111 (pg. 22)

*Unanimously Approved*

I. Revision Date: February 25, 2014

II. Course Information
A. College: College of Arts and Sciences
B. Course Prefix: ENGL—English
C. Course Number: ENGL A109
D. Credits: 3.0
E. Contact Hours: (3 + 0)
F. Course Title: Introduction to Writing in Academic Contexts
G. Grading Basis: A-F
H. Implementation Date: Spring 2015
I. Cross Listing/Stacking: N/A
J. Course Description: Emphasizes longer essays, annotated bibliography, and digital literacy skills in a computerized environment. Teaches students to analyze audience, purpose, and context; to apply conventions of academic writing and basic research; and to use sound revision strategies (including editing for grammar and punctuation). Special Note: Serves as an alternative to PRPE A108 and prepares students for ENGL A111.

K. Special Attributes: N/A
L. Course Prerequisites: [PRPE A086 with a minimum grade of C] OR [Accuplacer-Reading Comprehension with a score of 065 and Accuplacer-Sentence Skills with a score of 075]

M. Course Fees: Yes

III. Course Level Justification
ENGL A109 prepares students for successful completion of ENGL A111 and serves as an introductory course to college composition.

IV. Instructional Goals and Student Learning Outcomes
A. Instructional Goals:
The instructor will:
- Familiarize students with digital environments, including basic word processing tools and Blackboard.
- Demonstrate basic research strategies, including information literacy practices, source handling, and APA documentation.
- Introduce principles of academic writing generated for specific purposes, including summary and response, explanatory, analytical, and persuasive writing.
• Demonstrate effective revision strategies.

B. Student Learning Outcomes and Assessment Methods. The student will:

<table>
<thead>
<tr>
<th>Student Learning Outcomes</th>
<th>Assessment Methods</th>
</tr>
</thead>
<tbody>
<tr>
<td>Construct papers using word processing tools and submit assignments on Blackboard</td>
<td>Word-processed essays, group work, electronic discussion boards, quizzes, and/or class exercises</td>
</tr>
<tr>
<td>Analyze, synthesize, summarize, and use sources responsibly</td>
<td>Word-processed essays, annotated bibliographies, group work, quizzes, reading journals, and/or class exercises</td>
</tr>
<tr>
<td>Prepare papers in a variety of academic genres, each focused on fulfilling a specific purpose</td>
<td>Word-processed essays, short writing assignments, and exams</td>
</tr>
<tr>
<td>Analyze written texts prior to revision, revise papers, and proofread for appropriate use of Standard American English</td>
<td>Peer reviews, drafts, exams, quizzes, and/or class exercises</td>
</tr>
</tbody>
</table>

V. Course Outline

A. Digital Environment
1. Electronic techniques for writing papers
2. Electronic techniques for in-class writing
3. Electronic techniques for revising writing
4. Electronic course platforms such as Blackboard

B. Academic Writing
1. Rhetorical situation
2. Summaries
3. Reading responses
4. Annotated bibliographies
5. Writing generated by specific purposes as selected from the following choices (generally, 3-4 per semester):
   a. Explanatory essays
   b. Analytical essays
   c. Persuasive essays
   d. Investigative essays
   e. Evaluative essays
f. Observational essays

g. Research-supported essays (400-800 words)

C. Basic Research Strategies
1. Libraries and databases
2. Internet sources
3. Source evaluation and information literacy
4. APA documentation

D. Conventions and Style of Standard American English
1. Structure
2. Correctness
3. Error patterns
4. Academic style

E. Revision
1. Drafting
   a. Technology aids
   b. Drafting and revising
2. Coherence and focus
3. Purpose
4. Editing and proofreading

VI. Suggested Texts

VII. Bibliography

III. Instructional Goals and Student Learning Outcomes
A. Instructional Goals. The instructor will:
   1. Guide students in understanding the roles of habitat preservation, population integrity, and application of conservation policy to maintain natural ecosystems and biota.
   2. Teach students to analyze conservation problems in a multidisciplinary manner with considerations of economics, law, policy and biological principles.
   3. Teach students to assess environmental degradation using standardized protocols and modern instruments, and analyze resulting data.

B. Student Learning Outcomes and Assessment Measures

</table>

IV. Course Level Justification

Students are required to learn and integrate information from a variety of scientific disciplines; to read, to understand, and to apply ideas conveyed by primary scientific literature; to synthesize chemical, geological, ecological and biological knowledge and social considerations; and to apply course materials to this topic.

V. Topical Course Outline

A. Impacts and Drivers
   1. What is Conservation Biology?
   2. Status of Biodiversity
   3. Predicting Biodiversity
   4. Conservation Hotspots
   5. Extinctions and Its Consequences
   6. Rarity and Small Populations
   7. Habitat Change
   8. Environmental Change
   9. Climate Change
   10. Invasive Species

B. Problems and Approaches
   1. Metapopulations and Populations
   2. Conserving Metapopulations
   3. Habitat Fragmentation
   4. Landscape Analysis and Corridors
   5. Edges, Areas, and Reserves
   6. Habitat Mitigation and Environmental Reconstruction
   7. Conservation Management
   8. Risk Analysis and Decisions
   9. Complex Decision Making
C. Issues and Controversies
   1. Biodiversity and Human Health
   2. Sustainable Development
   3. Endangered Species Act
   4. Ecological Services and Ecosystem Functions
   5. Reserves and Ecological Justice
   6. Environmental Security

University of Alaska Anchorage  
College of Arts and Sciences  
Course Content Guide

I. Date of Initiation: Spring 2014

II. Curriculum Action Request
A. College: College of Arts and Sciences
B. Course Prefix: BIOL
C. Course Number: A481
D. Number of Credits: 3
E. Contact Hours: 3+0
F. Course Title: Marine Biology
G. Grading Basis: A-F
H. Implementation Date: Fall 2015
I. Cross-listed/Stacked: N/A
J. Course Description: Examines marine biology with a focus on understanding the pathways and transformation of energy and matter in coastal, pelagic, and benthic waters, particularly those in Alaska. Studies the influence of the physical environment, climate change, and human activities on marine species diversity, food webs, and tropho-dynamics.
K. Course Prerequisites: [BIOL A271 or ENVI A211] with minimum grade of C.
L. Course Co-requisites: N/A
M. Other Restrictions: N/A
N. Registration Restrictions: Completion of all GER Tier 1 courses is required.
O. Course Fees: No

III. Instructional Goals and Student Learning Outcomes
A. Instructional Goals. The instructor will:
   1. Provide a basic description of the physical, chemical, and geological properties of the ocean, and the different ocean habitats
   2. Build on this conceptual framework to describe how physical and biological ocean systems are impacted by changing climate and human activities
   3. Link physical features of the ocean habitat (pre- and post- human impact) to ocean trophic dynamics and food webs.
   4. Emphasize the extent and historical/geographic patterns of human impacts on the marine environment, and describe how these impacts are mediated by and through biological and physical processes.
   5. Provide detailed examples of how the physiological traits of organisms are uniquely linked to their habitat, and how changes in that habitat may influence species diversity and abundance through impacts on physiological properties.
   6. Relate current issues in Alaskan marine ecosystems and resources with a focus on balancing the many values represented in our environment.
   7. Teach students how to evaluate and integrate information from a variety of different sources and perspectives.
B. Student Learning Outcomes and Assessment Measures
### Student Learning Outcomes:
Upon completion of this course, the student will be able to:

<table>
<thead>
<tr>
<th></th>
<th>Assessment Measures</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. Identify and assess the linkages between the chemistry and physiology of living organisms and the physical and biological aspects of the marine environment.</td>
<td>Written assignments and examinations</td>
</tr>
<tr>
<td>2. Integrate information from scientific articles, lecture and textbook assignments, to evaluate the scientific accuracy of popular press (TV, newspaper, magazine, web) reports on marine issues</td>
<td>Exams, written assignments, and graded discussions</td>
</tr>
<tr>
<td>3. Communicate to peers an understanding of the marine ecosystem, and the direct and indirect impacts that humans are having on the system</td>
<td>In-class presentation, exams, and writing assignment</td>
</tr>
<tr>
<td>4. Analyze, assess, and evaluate the impact that humans are having on the marine system through in depth study of current 'hot topics' such as global warming, fisheries collapse etc.</td>
<td>Presentations, exams, and written assignments</td>
</tr>
</tbody>
</table>

### IV. Course Level Justification
This course builds on concepts presented in 200 level courses. Students are required to learn and integrate information from a variety of scientific disciplines as it relates to marine ecosystems, to read, understand, and apply ideas conveyed by primary scientific literature, to synthesize biological knowledge and social considerations; and to apply course materials to current problems.

### V. Topical Course Outline

A. Basic Principles of Physical Oceanography  
   1. Properties of water, salt, temperature, light  
   2. Coriolis effect and tides  
   3. Wind-driven and thermohaline circulation  
B. Major Ocean Currents and Domains  
   1. Global circulation patterns  
   2. Alaskan circulation patterns  
   3. Thermoclines, fronts, gyres, eddies  
C. Ocean Climates & Impact of Global Warming  
   1. Seasonal patterns of heat flux  
   2. Impact of ice on currents  
   3. Feedback loops  
D. Ecology of the Open Ocean  
   1. Sources of organic and inorganic nutrients  
   2. Phytoplankton diversity & adaptations  
   3. Factors influencing primary productivity  
E. Pelagic food webs  
   1. Zooplankton and methods for exploiting phytoplankton  
   2. Necton and foraging adaptations  
F. Trophic dynamics and foods webs  
   1. Fisheries and their ecological and social impacts
2. Major fisheries species & locations

G. Methods of resource exploitation
   1. Impact of overfishing on ecosystem
   2. Management methods and legislation
   3. Impact of different management regimes on fishers

H. Ecology of the coastal zones
   1. Physical challenges and adaptations
   2. Nutrients and tropho-dynamics in various marine environments

I. Coastal polar ecosystems

J. Impacts of coastal development and use
   1. On physical habitat
   2. On biological habitats
   3. On health of the ecosystem
   4. Potential solutions / remediation

L. Course Co-requisites: N/A
M. Other Restrictions: N/A
N. Registration Restrictions: N/A
O. Course Fees: No

III. Instructional Goals and Student Learning Outcomes
A. Instructional Goals. The instructor will:
   1. Provide a description of the abiotic and biotic environments from the micro to the global scale.
   2. Discuss the role of key abiotic processes that vary spatially and temporally that have major effects on organisms, ecosystems and landscapes.
   3. Provide advanced information on food web ecology, atmospheric processes, land use patterns and migration ecology.
   4. Introduce the vocabulary of Geographic Information Systems.
   5. Introduce GIS concepts through discussion of spatial patterns in abiotic traits, animal distributions and migration dynamics.
   6. Conduct class exercises in ArcGIS.
   7. Encourage class discussion of spatial issues that are of relevance to Alaska, the Arctic and the global community.
   8. Help students understand GIS applications to research and resource management.

B. Student Learning Outcomes and Assessment Measures:

<table>
<thead>
<tr>
<th>Student Learning Outcomes: Upon completion of</th>
<th>Assessment Measures</th>
</tr>
</thead>
</table>

23
this course, the student will be able to:

| 1. Describe traits of the abiotic and biotic environment that have important spatial and temporal patterns. | Written assignments and examinations |
| 2. Describe key migration and food web traits in northern systems and key spatial patterns. | Written assignments and examinations |
| 3. Explain and use the key facets of GIS tools and their application to spatial ecology | Written assignments, examinations and classroom exercises |
| 4. Explain some of the causes of spatial and temporal patterns of animal distributions, atmospheric chemistry, the water and the carbon cycles. | Written assignments and examinations |
| 5. Describe how important societal processes—land use change—is being manifested spatially in Arctic and Temperate systems. | Written assignments and examinations, classroom discussions |
| 6. Interpret the causes of spatial and temporal patterns in abiotic and biotic traits. | Written assignments and examinations, classroom discussions |

IV. Course Level Justification
The class builds upon a foundation of basic biological, ecological and environmental knowledge. It assumes some proficiency with the vocabulary of biology and environmental sciences. It is similar to other senior level courses in ecology at other universities.

V. Topical Course Outline
A. Overview of Landscape Ecology
   1. Facets of Abiotic Traits-micro to global scales
      a. Precipitation
      b. Temperature
   2. Properties of Key Biotic traits
      a. Animal Abundances
      b. Species Distributions
   3. Watershed and Ecosystem Processes
      a. Biogeochemical Cycles
      b. Linkages between system components
   4. Food web Ecology
      a. Land
      b. Aquatic
      c. Marine
   5. Migration Ecology
      a. Birds
      b. Fish
      c. Mammals
B. Spatial and temporal patterns in Landscapes
   1. Spatial and temporal variation in Abiotic traits
      a. Precipitation
      b. Atmospheric Chemistry
      c. Temperature
   2. Spatial and temporal variation in biotic traits
      a. Birds
      b. Fish
c. Mammals  
d. Insects  
e. Human activities  

C. Geographic Information Systems  
1. ArcGIS Introduction  
2. Data Collection  
3. Data Management  
4. Types of GIS files  
   a. Shapefiles/geodata bases  
5. Retrieval of data-bases  
6. Development of Data layers  
7. Modeling techniques for GIS data  

D. Application exercises in GIS and Spatial Ecology  
1. Compare existing techniques for modeling species distribution, habitat use, and niche selection  
2. Apply advanced spatial analysis techniques to real-world migration ecology, conservation biology, precipitation and biogeochemistry, food web ecology, and case examples based on Alaska, Arctic, Boreal and Global ecology.

Course Content Guide

I. Date of Initiation: Spring 2014

II. Curriculum Action Request
A. College: College of Arts and Sciences
B. Course Prefix: BIOL
C. Course Number: A484
D. Number of Credits: 4
E. Contact Hours: 0+8
F. Course Title: Experiential Learning: Exploration Ecology Field Study
G. Grading Basis: A-F
H. Implementation Date: Fall 2015
I. Cross-listed/Stacked: N/A
J. Course Description: Field exploration of the principles and techniques used for study and collection of baseline ecological data in remote landscapes. Course activities will focus on field survey and methodology, and design of simple ecological projects as well as those with complex and multidisciplinary components.
K. Course Prerequisites: N/A
L. Course Co-requisites: BIOL A483
M. Other Restrictions: N/A
N. Registration Restrictions: Instructor Approval
O. Course Fees: Yes

III. Instructional Goals and Student Learning Outcomes
A. Instructional Goals. The instructor will:
   1. Provide a basic understanding of ecological survey and analysis
   2. Enable students to apply theory to field-based settings.
   3. Assist students in acquiring skills needed for acquisition and analysis of data, interpretation of results, and preparation of reports and publication.

B. Student Learning Outcomes and Assessment Measures

<table>
<thead>
<tr>
<th>Student Learning Outcomes: Upon completion of this course, the student will be able to:</th>
<th>Assessment Measures</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. Design and conduct field based ecological research</td>
<td>Written assignments and data logs.</td>
</tr>
<tr>
<td>2. Utilize field-collected data in scientific analysis</td>
<td>Written assignments and reports</td>
</tr>
<tr>
<td>3. Initiate, understand, and follow appropriate safety, collection, landuse, and other regulations</td>
<td>Permits, forms, and reports</td>
</tr>
</tbody>
</table>
IV. **Course Level Justification**  
This course builds field course offerings in the department and greater course depth in advanced ecology and environmental biology.

V. **Topical Course Outline**  
Lab 1: Lab and Field Safety  
Lab 2: Techniques of Sample Counts (Mark-Recapture, N-mixture Models)  
Lab 3: Techniques of Sample Counts 2  
Lab 4: Field Survey Techniques  
Lab 5: Distance Sampling, Indices, and Metrics  
Lab 6: Indirect Sampling by Proxy  
Lab 7: Indirect Sampling by Proxy 2  
Lab 8: Introduction to R Programming  
Lab 9: Multivariate Analysis, Groups  
Lab 10: Multivariate Analysis, Gradients  
Lab 11: Multivariate Analysis, Higher-order and Discrete  
Lab 12: Meta-Analysis.

C. Course Number: A486
D. Number of Credits: 3
E. Contact Hours: 3+0
F. Course Title: Evolutionary Ecology
G. Grading Basis: A-F
H. Implementation Date: Fall 2015
I. Cross-listed/Stacked: N/A
J. Course Description: Explores conceptual issues in the evolution of life histories and species interactions, as well as foundational and contemporary research in topics such as quantitative genetics, natural selection, and the evolution of sex. The course includes collection, interpretation, and integration of data into papers and presentations.
K. Course Prerequisites: [BIOL A271 and BIOL A288] with minimum grade of C
L. Course Co-requisites: N/A
M. Other Restrictions: N/A
N. Registration Restrictions: None

III. Instructional Goals and Student Learning Outcomes
A. Instructional Goals. The instructor will:
   1. Provide a basis for understanding the principles of the evolution.
   2. Explain common themes in the evolution of life histories
   3. Present foundational and contemporary studies for discussion.
   4. Contrast a range of approaches in the study of evolutionary ecology.
   5. Present important themes and primary literature in evolutionary ecology in the instructor’s area of expertise (e.g., vertebrate evolution, plant-animal interactions, etc.)

B. Student Learning Outcomes and Assessment Measures

<table>
<thead>
<tr>
<th>Student Learning Outcomes: Upon completion of this course, the student will be able to:</th>
<th>Assessment Measures</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. Contrast the ecological contexts that result in the evolution of various life history traits.</td>
<td>Examinations and/or written assignments</td>
</tr>
<tr>
<td>2. Synthesize the relationships of trait variation, heritability, and phenotypic selection to explain responses to evolution.</td>
<td>Examinations and/or written assignments</td>
</tr>
<tr>
<td>3. Evaluate foundational and contemporary research in evolutionary ecology.</td>
<td>Discussions and/or student presentations</td>
</tr>
</tbody>
</table>
IV. **Course Level Justification**

This course employs fundamental elements in evolution, genetics, and ecology in a synthetic approach to explore contemporary research questions in the field and is similar to other 400-level ecology courses offered at other universities.

V. **Topical Course Outline**

A. Introduction and Basic Principles
B. Fundamental Patterns in Evolution
   1. Macroevolutionary perspective: Speciation, Extinction, and Diversification Rates
C. Trait Variation and Natural Selection
   1. Phenotypic, Genotypic, Environmental Sources of Variation
   2. Changes in Trait Distribution Within Generations
D. Phenotypic Plasticity
   1. Genotype by Environmental Interactions
E. Fitness and Evolutionarily Stable Strategies
F. Quantitative Genetics and Heritability
   1. Additive and Non-Additive sources of Phenotypic Variation
   2. Measuring Trait Heritability
   3. Response to Selection
   4. Correlated Trait Evolution
G. Allocation and Trade-Offs
H. Evolution of Sex and Mating Systems
   1. Costs and Benefits of Gene Exchange
   2. Patterns of Outcrossing, Mixed Mating, and Self-fertilization
I. Sexual Selection
J. Evolutionary Patterns in Birth, Growth, and Death
   1. Offspring Number and Size
   2. Growth Rates
   3. Timing of Reproduction
   4. Senescence
K. Evolution of Species Interactions
   1. Coevolution
   2. Character Displacement
   3. Defense
   4. Mutualism
L. Patterns Specialization and Generalization

B. Course Prefix: BIOL
C. Course Number: A487
D. Number of Credits: 3
E. Contact Hours: 3+0
F. Course Title: Comparative Anatomy of Vertebrates
G. Grading Basis: A-F
H. Implementation Date: Fall 2015
I. Cross-listed/Stacked: N/A
J. Course Description: A comparative exploration of vertebrate anatomy. The aim of the course is to investigate the links between the forms and functions of shared organ systems and to discuss their evolutionary, ecological and physiological implications.

K. Course Prerequisites: BIOL A288 with minimum grade of C.
L. Course Co-requisites: N/A
M. Other Restrictions: N/A
N. Registration Restrictions: N/A
O. Course Fees: No

III. Instructional Goals and Student Learning Outcomes
A. Instructional Goals. The instructor will:
   1. Present the principles of comparative vertebrate anatomy and integrate biological principles of chordate (particularly vertebrate) structure, function and ecology.
   2. Characterize how organ systems within the vertebrates are related phylogenetically and evolutionarily.
   3. Describe important anatomical features and phylogenetic relationships within the vertebrates, including the comprehension of phylogenetic relationships.

B. Student Learning Outcomes and Assessment Measures

<table>
<thead>
<tr>
<th>Student Learning Outcomes: Upon completion of this course, the student will be able to:</th>
<th>Assessment Measures</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. Describe principles of comparative vertebrate anatomy mirrored by evolutionary associations between the structure, function and ecology of chordate phyla (particularly vertebrates).</td>
<td>Written assignments and examinations</td>
</tr>
<tr>
<td>2. Master and apply the necessary background knowledge and intellectual skills required to discuss and critically evaluate the fundamental features associated with vertebrate functional morphology and its evolution.</td>
<td>Written assignments and examinations</td>
</tr>
</tbody>
</table>
3. Identify vertebrate organ systems and their structure and functions

4. Master the vocabulary and nomenclature associated with the anatomy of the vertebrate organ systems

IV. Course Level Justification
This course is designed for Biological and Natural Sciences majors as an elective undergraduate course comparable to 400-level comparative anatomy of vertebrates courses offered at other universities. This course covers the principle concepts and processes of comparative vertebrate anatomy in the context of evolution and is essential to the student’s ability to succeed and integrate content with other 400-level courses in biological sciences.

V. Topical Course Outline
A. Evolution and Morphology
B. Origins of the Chordates
C. Vertebrate Diversity
   1. Aquatic vertebrates: Jawless fish, Cartilagenous fish, Bony fish
   2. Terrestrial vertebrates: Amphibians and Amniotes
D. Biological Design
   1. Size and shape
   2. Biomechanics
E. Life History and Vertebrate Development
F. Integumentary system (the skin)
G. Skeletal system
   1. Skull
   2. Axial skeleton
   3. Appendicular skeleton
H. Muscular system
I. Respiratory system
J. Circulatory system
K. Digestive system

19. Justification for Action

The title, description and contact hours are being updated to reflect course design and content. As part of our overall curriculum revision, which seeks to align our degree with the core concepts and competencies in Vision and Change in Undergraduate Biology Education (National Science Foundation and American Association for the Advancement of Science), this course will become part of our rotation of upper division electives in molecular biology. It is being revised as an experiential learning course which combines conceptual theory and an authentic laboratory experience into a single course.

Course Content Guide

I. Date of Initiation:  
Spring 2014

II. Curriculum Action Request
A. College:  
College of Arts and Sciences
B. Course Prefix:  
BIOL
C. Course Number:  
A488
D. Number of Credits:  
4
E. Contact Hours:  
2+4
F. Course Title:  
Experiential Learning: Developmental Biology
G. Grading Basis:  
A-F
H. Implementation Date:  
Fall 2015
I. Cross-listed/Stacked:  
N/A
J. Course Description:  
An in depth study of the molecular and cellular principles which underlie the development of tissues and organ systems in animals, including classical embryology through utilization of numerous laboratory techniques within an authentic experiential learning environment.
K. Course Prerequisites:  
BIOL A252 with minimum grade of C.
L. Course Co-requisites:  
N/A
M. Other Restrictions:  
N/A
N. Registration Restrictions:  
None
O. Course Fees:  
Yes

III. Instructional Goals and Student Learning Outcomes
A. Instructional Goals. The instructor will:
1. Explain and provide a framework for understanding the principles and key concepts of development, and describe the process.
2. Provide hands-on examples by which genes in the fertilized egg control cell behavior in the embryo to determine its pattern, form and behavior.
3. Discuss the latest research findings relevant to embryogenesis and how genes and epigenetics control cell behavior and development.
4. Train students in classical histology and in the latest research techniques in developmental biology.

B. Student Learning Outcomes and Assessment Measures

<table>
<thead>
<tr>
<th>Student Learning Outcomes: Upon completion of this course, the student will be able to:</th>
<th>Assessment Measures</th>
</tr>
</thead>
<tbody>
<tr>
<td>1.Illustrate the fundamental concepts of development in animals.</td>
<td>In class discussions, written assignments</td>
</tr>
<tr>
<td>2.Evaluate the mechanisms by which gene expression controls specific aspects of development in different model organisms.</td>
<td>Hands-on experiential learning including mating/fertilization, developmental staging, and RNA interference and analysis; written lab reports; in-class discussions</td>
</tr>
<tr>
<td>3.Analyze data presented in the primary literature on developmental biology.</td>
<td>Presentations, in class discussions</td>
</tr>
</tbody>
</table>
IV. Course Level Justification
This course is designed for Biological and Natural Sciences majors as an elective undergraduate course comparable to 400-level developmental biology courses offered at other universities.

V. Topical Course Outline
A. Basic concepts of development
B. Model organisms
   1. *Xenopus*, axolotls, *Drosophila*, sea urchin, chick, pig
C. Developmental genes
D. Vertebrate body axes
E. Specification of vertebrate germ layers
F. Gastrulation
G. Somite formation and patterning
H. Organizer region and neural induction
I. Maternal and early embryonic genes
J. Segmentation and homeotic genes
K. Neural tube formation, neural crest migration and other cell movements
L. Epigenetics and gene expression in development
M. Inheritance of patterns of gene expression
N. Control of gene expression
O. Organogenesis and limb formation
P. Axonal guidance and synapse formation
Q. Sex determination
R. Germ cells and fertilization
S. Regeneration
T. Growth, metamorphosis, aging
U. Evolution and development

III. Instructional Goals and Student Learning Outcomes
A. Instructional Goals. The instructor will:
1. Provide a basic description of evolutionary theory and concepts
2. Build on the conceptual framework to describe how evolutionary process results in evolutionary pattern
3. Link current research on microevolutionary processes relate to observed responses to environmental and climate change
4. Emphasize the underlying quantitative processes that structure the living world, and enable students to undertake analyses and conceptualization of processes on their own
5. Provide detailed examples of modern evolutionary analysis and theory as mechanisms of biotic change and diversification
6. Relate all of the above to current issues in local and national debate on endangered populations, relevance of evolution thought to modern life (evolutionary medicine, emerging disease and virulence, endangered species, etc.)
7. Assist students to learn how to evaluate and integrate information from a variety of sources and perspectives.

B. Student Learning Outcomes and Assessment Measures
Students will be able to:

</table>

**IV. Course Level Justification**

Students are required to learn and integrate information from a variety of scientific disciplines as it relates to applied genetics, advanced evolutionary analysis, and microevolutionary processes; to read, understand, and apply ideas conveyed by primary scientific literature; to synthesize current biological knowledge and evolutionary theory; and to apply course materials to current problems.

GER Integrative Capstone Justification:

Justifications for designating BIOL A489 Population Genetics and Evolutionary Theory as a GER Integrative Capstone course include:

1. Knowledge Integration/Interrelationships and synergy among GER disciplines: The overall theme of the course is understanding the relationship of evolutionary processes to other natural and social sciences. The course will focus on the interfaces among physical sciences (biochemistry, geological history, mathematics), biological sciences (biology, ecology, conservation, molecular biology, etc.), and the social sciences (particularly human biology, sociology, anthropology).

2. Effective Communication Skills: Course success demands effective communication through essay examinations, individual classroom presentations, brief reports (oral and written) on current controversies surrounding evolution and evolutionary processes, and a final research product.

3. Critical Thinking: Students will not be able to succeed in the course unless they are able to integrate information across disciplines, and critically evaluate the reliability of data and positions presented in lecture, texts, scientific, and popular viewpoints. Student ability to critically evaluate diverse material will be determined based on writing assignments, class presentations, and examinations.

4. Information Literacy: Students are expected to achieve and demonstrate computer and internet skills for acquiring information relevant to current topics in evolutionary biology. This will involve research in the primary scientific literature, and the collection of information from unpublished sources such as popular press and public statements. Students will be required to show that they can critically winnow facts and scientific content from diverse non-scientific sources.
5. Quantitative Perspectives: A critical understanding of evolutionary processes is grounded in many quantitative disciplines, including statistical analysis, applied maths (algebra, calculus, probability and combinatorics, etc.), general and advanced genetics, molecular biology. In addition, students must be able to read and interpret scientific data in graphical and tabular form, and to generate appropriate graphical displays of their own results. Microevolutionary analysis is only possible using sophisticated computer-based analytical techniques including: Bayesian analysis, Monte Carlo simulation, maximum likelihood analysis, and discrete graph analysis. Exams will specifically test on these skills.

6. Evolving realities of the 21st century: The growing understanding that evolution is a dynamic and everpresent component of modern life, particularly in the context of climate change and anthropogenic change, touches many aspects of science, policy, and social attitudes. This course will help students understand the implication of evolutionary process in a changing environment, and provide them with effective means to communicate its important and relevance for individuals and society.

V. Topical Course Outline
   A. Population Structure
      1. Hardy Weinberg Equilibrium
      2. Systems of Mating
      3. Demographics
      4. Genetic Drift
      5. Neutrality and Molecular Evolution
      6. Coalescence
      7. Gene Flow & Subdivision
      8. Founders and Survivors
      9. mtDNA, Y-DNA: Separating History From Gene Flow
   B. Genotype and Phenotype
      1. Quantitative Genetics: Means
      2. Quantitative Genetics: Variances
      3. The Unmeasured Genotype Approach
      4. The Measured Genotype Approach
   C. Selection
      1. Measures of Fitness
      2. Constant Fitness Models
      3. Selection on Quantitative Traits and FFTNS
      4. Pleiotropy and Developmental Constraints
      5. The Shifting Balance Theory
   D. Units and Targets of Selection
      1. The Unit of Selection
      2. Meiotic and Molecular Drive
      3. Sexual, Frequency and Density Dependent Selection I
      4. Asexual selection, lateral gene transfer
   E. Ecological Genetics
      1. Environmental Heterogeneity
      2. Niche and Mimicry
      3. Coevolution and Host-parasite Systems
      4. Life History Evolution
   F. Human Evolution and Sociobiology
      1. Hominid Evolution
      2. Altruism and Group Selection
3. Cultural Evolution

IV. Course Level Justification
Designed for Biological and Natural Sciences majors and as elective undergraduate course comparable to 400-level teaching practica offered at other universities. Enables students to plan and present materials, conduct exams and quizzes, and correlate laboratory presentations with lecture material under direct supervision and mentoring of department faculty.

V. Topical Course Outline
A. Student will attend all weekly laboratory sessions for the course assigned
B. Student will attend all weekly planning meetings
C. Student will assist course enrollees with experiments and answer questions during class
D. Student will prepare and deliver 2 separate laboratory/experiential learning lead-ins
   1. Student will help prepare quizzes, exam questions and homework questions associated with the 2 laboratory lead-ins they prepare
   2. Student will help grade quizzes, exam questions and homework questions associated with the 2 laboratory lead-ins they prepare

VI. Suggested Texts
The text will vary depending on the assigned class for instructor practicum.

RE: Changes to the B.A. in Biological Sciences Degree

The Department of Biological Sciences proposes the following changes to the B.A. in Biological Sciences Degree:

1. Changes to the core course requirements
2. Organize upper division electives into five areas
3. Updating upper division course offerings

These changes are intended to ensure that core course requirements prepare students for upper division electives as well as improve the depth and breadth of exposure to sub-disciplines within the biological sciences. The purpose for making these changes is to improve the time to completion of the degree and align our curriculum with the core concepts and competencies outlined in Vision and Change in Undergraduate Biology Education: A Call to Action (2013), a report of a national conference organized by the American Association for the Advancement of Science with support from the National Science Foundation.

Please contact me if you have any additional questions.

    Undergraduate Academic Board

From: Khrys Duddleston, Chair
    Department of Biological Sciences Curriculum Committee

RE: Changes to the B.S. in Biological Sciences Degree

The Department of Biological Sciences proposes the following changes to the B.S. in Biological Sciences Degree

1. Changes to the core course requirements
2. Organize upper division electives into five areas
3. Require students to take a minimum of three credits in four of the five areas, and a minimum of six experiential learning credits from 2 of the five areas

These changes are intended to ensure that core course requirements prepare students for upper division electives as well as improve the depth and breadth of exposure to sub disciplines within the biological sciences. The purpose for making these changes is to improve the time to completion of the degree and align our curriculum with the core concepts and competencies outlined in Vision and Change in Undergraduate Biology Education: A Call to Action (2013), a report of a national conference organized by the American Association for the Advancement of Science with support from the National Science Foundation.

Please contact me if you have any additional questions.

Biology is the science concerned with the study of living organisms. It encompasses a vast range of biological disciplines, from the study of microbes and molecular biology to the study of plants, animals and the environment. The undergraduate program in the Biological Sciences includes courses that provide students with a broad understanding of both traditional and modern biological sciences. These courses are suitable as preparation for professional degrees, teaching, or careers in government or industry. Both the Bachelor of Arts and the Bachelor of Science degrees are available for undergraduates. A Master of Science degree program in Biological Sciences as well as a joint UAA-UAF Doctor of Science degree program is available for students already holding a baccalaureate degree.

A program of study in the biological sciences requires completion of a basic science core curriculum in the chemical, physical and mathematical sciences as well as required and elective courses in the biological sciences. A degree in the biological sciences prepares students who wish to pursue careers in medicine, dentistry, veterinary medicine, ecology and the environmental sciences in the private or public sector, or who wish to attend graduate school. Students are strongly encouraged to consult with their academic advisors within the Department of Biological Sciences to determine which electives best suit their programmatic needs and career requirements.

The Bachelor of Arts and the Bachelor of Science degree programs require a total of 120-125 credits for graduation and can be completed in four years by students who have had adequate high school preparation in math and sciences. Refer to the beginning of this chapter for recommended high school courses.

Program Student Learning Outcomes

It is expected that graduates of the Biological Sciences program will:

1. Demonstrate an understanding of the core concepts in the biological sciences: evolution; structure and function relationships; information flow, exchange and storage; transformation of energy and matter
2. Apply the process of science and construct knowledge through observations, experimentation, quantitative reasoning and hypothesis testing
3. Read, analyze and synthesize primary literature, and communicate scientific concepts and data in written and oral form

Community Service Courses

The department offers a wide range of community service courses as a service to the people in the Anchorage area and extended campuses who wish to become more knowledgeable about the science of biology and how it relates to them. Unless noted otherwise in the course description, community service courses do not satisfy either core requirements or elective credit toward any degree programs in the biological sciences. All are offered as demand warrants.

- BIOL A074  Field Natural History
- BIOL A075  Local Flora
- BIOL A100  Human Biology
- BIOL A124  Biota of Alaska: Selected Topics
- BIOL A126  Birds in Field and Laboratory

Departmental Honors in Biology

Undergraduate Biological Science majors may be recognized for exceptional performance by earning departmental honors in Biology. In order to receive honors in biology, a student must meet each of the following requirements:

1. Meet the requirements for Graduation with Honors as listed in Chapter 7.
2. Meet the requirements for a BA/BS degree in Biological Sciences.
3. Earn a grade point average of 3.50 or above in the major requirements.
4. During the senior year of their academic program, the student must gain faculty approval for and complete, with a grade of B or better, a senior thesis research project, with enrollment in BIOL A499 Senior Thesis. Biological Science faculty members must approve the project proposal and final written report.

**Bachelor of Arts, Biological Sciences**

**Admission Requirements**

Complete the Admission to Baccalaureate Programs Requirements in Chapter 7.

**Academic Progress**

To graduate with a BA in Biological Sciences, the student must complete all courses covered under Major Requirements for a BA in Biological Sciences with a grade of C or better. All prerequisites for Biology courses must be completed with a grade of C or better. Students who audit, or are unable to earn a grade of C or better in, a lower-division (100 or 200 level) course in the Department of Biological Sciences (BIOL) may repeat the course two additional times on a space available basis. Students who audit, or are unable to earn a grade of C or better in, an upper-division (300 or 400 level) course in the Department of Biological Sciences may repeat the course one additional time on a space available basis. Students repeating a course in the Department of Biological Sciences are required to complete all components of that course during the semester in which the course is retaken. When repeating a course with a linked lecture and laboratory component, both components must be repeated. Students enrolled in a laboratory or Experiential Learning course in the Department of Biological Sciences must attend the lab or course the first week of class or they may be administratively dropped.

**Graduation Requirements**

Students must complete the following graduation requirements:

**A. General University Requirements**

Complete the General University Requirements for All Baccalaureate Degrees located at the beginning of this chapter.

**B. General Education Requirements**

Complete the General Education Requirements for Baccalaureate Degrees listed at the beginning of this chapter.

**C. College of Arts and Sciences Requirements**

Complete the College of Arts and Sciences Requirements listed at the beginning of the CAS section.

**D. Major Requirements**

1. Complete these required core courses (34-35 credits):

*Several courses are listed under more than one area. Each course can only count toward the credit requirement in one area.

**BIOL A498 credits may not be counted toward the Experiential Learning minimum requirement

**BIOL A490L credits may be counted toward the Experiential Learning minimum requirement

3. It is recommended that students complete 8 credits from the following:

- **GEOL A111** Physical Geology (4)
- **GEOL A221** Historical Geology (4)
  - or
- **PHYS A123** Basic Physics I (3)
  - and
- **PHYS A123L** Basic Physics I Laboratory (1)
- **PHYS A124** Basic Physics II (3)
and

PHYS A124L  Basic Physics II Laboratory (1)

or

PHYS A211  General Physics I (3)

and

PHYS A211L  General Physics I Laboratory (1)

PHYS A212  General Physics II (3)

and

PHYS A212L  General Physics II Laboratory (1)

4. A total of 124 credits is required for the degree, 42 credits of which must be upper division.

**Bachelor of Science, Biological Sciences**

The Bachelor of Science degree includes a single core program of coursework with electives selected from 4 sub-disciplines within the biological sciences. A wide selection of electives is available to all students, including courses offered under BIOL A490, which is a selected topics course. It is imperative that students consult their academic advisors within the Department of Biological Sciences to determine which electives are most appropriate to their career interests. Some of these elective courses are offered periodically, depending on demand. Refer to course descriptions to identify these courses.

**Admission Requirements**

Complete the Admission to Baccalaureate Programs Requirements in Chapter 7.

**Academic Progress**

To graduate with a BS in Biological Sciences, the student must complete all courses covered under Major Requirements for a BS in Biological Sciences with a grade of C or better. All prerequisites for Biology courses must be completed with a grade of C or better. Students who audit, or are unable to earn a grade of C or better in, a lower-division (100 or 200 level) course in the Department of Biological Sciences (BIOL) may repeat the course two additional times on a space available basis. Students who audit, or are unable to earn a grade of C or better in, an upper-division (300 or 400 level) course in the Department of Biological Sciences may repeat the course one additional time on a space available basis. Students repeating a course in the Department of Biological Sciences are required to complete all components of that course during the semester in which the course is retaken. When repeating a course with a linked lecture and laboratory component, both components must be repeated. Students enrolled in a laboratory or Experiential Learning course in the Department of Biological Sciences must attend the lab or course the first week of class or they may be administratively dropped.

**Graduation Requirements**

Students must complete the following graduation requirements:

**A. General University Requirements**

Complete the General University Requirements for All Baccalaureate Degrees located at the beginning of this chapter.

**B. General Education Requirements**

Complete the General Education Requirements for Baccalaureate Degrees listed at the beginning of this chapter.

**C. College of Arts and Sciences Requirements**

Complete the College of Arts and Sciences Requirements listed at the beginning of the CAS section.

**D. Major Requirements**

1. Some major requirements may also be used to satisfy the College of Arts and Sciences BS requirements.

2. Complete these required support courses (36 credits):

   - CHEM A105  General Chemistry I 3
   - CHEM A105L  General Chemistry I Laboratory 1
   - CHEM A106  General Chemistry II 3
CHEM A106L General Chemistry II Laboratory 1
CHEM A321 Organic Chemistry I 3
CHEM A322 Organic Chemistry II 3
CHEM A323L Organic Chemistry Laboratory 2
MATH A200 Calculus I 4
MATH A201 Calculus II 4
PHYS A123 Basic Physics I (3) 8
PHYS A123L Basic Physics I Laboratory (1) and
PHYS A124 Basic Physics II (3)
PHYS A124L Basic Physics II Laboratory (1) or
PHYS A211 General Physics I (3)
PHYS A211L General Physics I Laboratory (1) and
PHYS A212 General Physics II (3)
PHYS A212L General Physics II Laboratory (1)
STAT A253 Applied Statistics for the Sciences (4) 4
or
STAT A307 Probability and Statistics (4)

3. Complete Biological Sciences core courses (22 credits):
   BIOL A108 Principles and Methods in Biology 6
   BIOL A242 Fundamentals of Cell Biology 3
   BIOL A252 Principles of Genetics 3
   BIOL A271 Principles of Ecology 3
   BIOL A288 Principles of Evolution 3
   BIOL A243 Experiential Learning: Genetics and Cell Biology 4
   or
   BIOL A273 Experiential Learning: Ecology and Evolution 4
   BIOL A492 Undergraduate Seminar 1

4. Complete at least 24 credits of upper division program electives from the following areas.
   a. A minimum of 3 credits must come from each of 4 of the five 5 areas*.
   b. A minimum of 6 credits must be Experiential Learning from 2 areas**.  24

   Genetics, Cellular and Molecular Biology
   BIOL A340 Microbial Biology (3)
   BIOL A451 Microbial Biotechnology (3)
   BIOL A452 Human Genome (3)

BIOL A408  Experiential Learning: Scanning Electron Microscopy (SEM)

*Several courses are listed under more than one area. Each course can only count toward the credit requirement in one area.

**BIOL A498 credits may not be counted toward the Experiential Learning minimum requirement

**BIOL A490L credits may be counted toward the Experiential Learning minimum requirement

5. A total of 122-125 credits is required for the degree, 42 credits of which must be upper division.

Bachelor of Science, Natural Sciences

The Department of Biological Sciences also oversees the Bachelor of Science in Natural Sciences. This curriculum emphasizes the interrelationships among the sciences. A program of study in the Natural Sciences requires that students select an option within the degree, and complete all courses required within the option, as well as sufficient science elective courses to meet minimum unit requirements for graduation. Students accepted into this flexible degree program select one of three options: the General Sciences Option is designed for students who are interested in understanding the interrelationships among various scientific fields, or in teaching science at the secondary level. The Pre-Health Professions Option is designed to meet the admission requirements of specific professional schools in medicine, dentistry, and veterinary medicine. The Environmental Sciences Option is designed to prepare students for graduate school or for employment in the private or public sector.

For a complete program description see the Natural Sciences section of this chapter.

Minor, Biological Sciences

Students majoring in another subject who wish to minor in Biological Sciences must complete the following requirements. A total of 28 credits is required for the minor, 12 of which must be upper division.

BIOL A108  Principles and Methods in Biology  6
BIOL A242  Fundamentals of Cell Biology  3
BIOL A252  Principles of Genetics  3
BIOL A288  Principles of Evolution  3
Upper division Biological Sciences electives  12

C. Loren Buck, Professor, clbuck@uaa.alaska.edu
BIOLOGICAL SCIENCES

ConocoPhillips Integrated Sciences Building (CPSB), Room 101P, (907) 786-4770
www.uaa.alaska.edu/biology

Biology is the science concerned with the study of living organisms. It encompasses a vast range of biological disciplines, from the study of microbes and molecular biology to the study of plants, animals and the environment. The undergraduate program in the Biological Sciences includes courses that provide students with a broad understanding of both traditional and modern biological sciences. These courses are suitable as preparation for professional degrees, teaching, or careers in government or industry. Both the Bachelor of Arts and the Bachelor of Science degrees are available for undergraduates. A Master of Science degree program in Biological Sciences as well as a joint UAA-UAF Doctor of Science degree program is available for students already holding a baccalaureate degree.

A program of study in the biological sciences requires completion of a basic science core curriculum in the chemical, physical and mathematical sciences as well as required and elective courses in the biological sciences. A degree in the biological sciences prepares students who wish to pursue careers in medicine, dentistry, and veterinary medicine, ecology and the environmental sciences in the private or public sector, or who wish to attend graduate school. The organismal-ecology-evolution area is a more diversified curriculum emphasizing environmental, organismal, evolutionary, and general biological sciences preparatory for graduate school or for employment in the private or public sector.

Students are strongly encouraged to consult with their academic advisors within the Department of Biological Sciences to determine which electives best suit their programmatic needs and career requirements.

The Bachelor of Arts and the Bachelor of Science degree programs require a total of 124-125 credits for graduation and can be completed in four years by students who have had adequate high school preparation in math and sciences. Refer to the beginning of this chapter for recommended high school courses.

Program Student Learning Outcomes

It is expected that graduates of the Biological Sciences program will have the ability to:

1. Demonstrate an understanding of the core concepts in the biological sciences: evolution; structure and function relationships; information flow, exchange and storage; transformation of energy and matter.
2. Design and conduct projects that include fieldwork, laboratory analyses, and interpretation in the discipline.
3. Read, analyze and synthesize primary literature, and communicate scientific concepts and data in written and oral form.

Community Service Courses

The department offers a wide range of community service courses as a service to the people in the Anchorage area and extended campuses who wish to become more knowledgeable about the science of biology and how it relates to them. Unless noted otherwise in the course description, community service courses do not satisfy either core requirements or elective credit toward any degree programs in the biological sciences. All are offered as demand warrants.

Departmental Honors in Biology

Undergraduate Biological Science majors may be recognized for exceptional performance by earning departmental honors in Biology. In order to receive honors in biology, a student must meet each of the following requirements:

1. Meet the requirements for Graduation with Honors as listed in Chapter 7.
2. Meet the requirements for a BA/BS degree in Biological Sciences.
3. Earn a grade point average of 3.50 or above in the major requirements.
4. During the senior year of their academic program, the student must gain faculty approval for and complete, with a grade of B or better, a senior thesis research project, with enrollment in BIOL A499 Senior Thesis. Biological Science faculty members must approve the project proposal and final written report.

Bachelor of Arts, Biological Sciences

Admission Requirements

Complete the Admission to Baccalaureate Programs Requirements in Chapter 7.

Academic Progress

To graduate with a BA in Biological Sciences, the student must complete all courses covered under Major Requirements for a BA in Biological Sciences with a grade of C or better. All prerequisites for Biology courses must be completed with a grade of C or better. Students who audit, or are unable to earn a grade of C or better in, a lower-division (100 or 200 level) course in the Department of Biological Sciences (BIOL) may repeat the course two additional times on a space available basis. Students who audit, or are unable to earn a grade of C or better in, an upper-division (300 or 400 level) course in the Department of Biological Sciences may repeat the course one additional time on a space available basis. Students repeating a course in the Department of Biological Sciences are required to complete all components of that course during the semester in which the course is retaken. When repeating a course with a linked lecture and laboratory component, both components must be repeated. Students enrolled in a laboratory or Experiential Learning course in the Department of Biological Sciences must attend the lab or course the first week of class or they may be administratively dropped.

Graduation Requirements

Students must complete the following graduation requirements:

A. General University Requirements

Complete the General University Requirements for All Baccalaureate Degrees located at the beginning of this chapter.

B. General Education Requirements

Complete the General Education Requirements for Baccalaureate Degrees listed at the beginning of this chapter.

C. College of Arts and Sciences Requirements

Complete the College of Arts and Sciences Requirements listed at the beginning of the CAS section.

D. Major Requirements

1. Complete these required core courses (36-38 credits):

<table>

BIOL A273  Experiential Learning: Ecology and Evolution 4
BIOL A492  Undergraduate Seminar 1
CHEM A105  General Chemistry I 3
CHEM A105L  General Chemistry I Laboratory 1
CHEM A106  General Chemistry II 3
CHEM A106L  General Chemistry II Laboratory 1
STAT A252  Elementary Statistics (3) 3-4
or
STAT A253  Applied Statistics for the Sciences (4)
or
STAT A307  Probability and Statistics (4)

2. Complete 18-19 credits of upper division program electives from the following four areas.

- A minimum of 3 credits must come from each of 4 of the 5 areas.*
- A minimum of 6 credits must be Experiential Learning from 2 areas**. 18-19

- Genetics, Cellular and Molecular Biology
  - BIOL A340  General Microbiology/Microbial Biology (3)
  - BIOL A451  Applied Microbiology/Microbial Biotechnology (3)
  - BIOL A452  Human Genome (3)
  - BIOL A453  Human Genome (3)
  - BIOL A461  Molecular Biology (3)
  - BIOL A462  Virology (3)
  - BIOL A463  Molecular Biology of Cancer (3)
  - BIOL A464  Metals in Biology (3)
  - BIOL A461L  Molecular Biology Laboratory (3)
  - CHEM A471  Immunochemistry/Immunology (4)

- Experiential Learning: Microbial Biology (4)
  - BIOL A402  Microtechnique (4)
  - BIOL A404  Experiential Learning: Microbial Ecology (4)
  - BIOL A454  Experiential Learning: Microbial Biotechnology (4)
  - BIOL A455  Experiential Learning: Bioinformatics (4)
  - BIOL A465  Experiential Learning: Molecular Biology (4)

- Ecology and Evolution
  - BIOL A365  Astrobiology (3)
  - BIOL A430  Marine Mammals and Seabirds (3)
  - BIOL A441  Animal Behavior (3)
  - BIOL A445  Plant-Herbivore Ecology (4)
  - BIOL A450  Microbial Ecology (3)
  - BIOL A309/A472  Biogeography (3)
  - BIOL A373/A473  Conservation Biology (3)
  - BIOL A474  Ecotoxicology (3)
  - BIOL A475  Fish Ecology (2)
  - BIOL A476  Wildlife Population Dynamics and Management (3)
BIOL A414  Chronobiology (3)
BIOL A415  Comparative Animal Physiology (3)
BIOL A416  Exercise Physiology (3)
BIOL A418  Fish Physiology (3)
BIOL A479  Physiological Plant Ecology (3)

BIOL A487  Comparative Anatomy of Vertebrates (3)

Additional Upper Division Electives

ASTR/
BIOL A365  Astrobiology (3)
BIOL/CHEM/PHYS A456  Nonlinear Dynamics and Chaos (3)

BIOL A490  Selected Lecture Topics in Biology (1-3)
BIOL A490L  Selected Laboratory Topics in Biology (1-3)
BIOL A495  Instructional Practicum: Laboratory (1)
BIOL A497  Independent Study in Biology (1-12)
BIOL A498  Individual Research (1-6)
BIOL A499  Senior Thesis (3)
BIOL A490L  Selected Laboratory Topics in Biology (1-3)

BIOL A406  Experiential Learning: Biostatistics (4)
BIOL A408  Experiential Learning: Scanning Electron Microscopy (SEM) (6)

*Several courses are listed under more than one area. Each course can only count toward the credit requirement in one area.

**BIOL A498 credits may not be counted toward the Experiential Learning minimum requirement

**BIOL A490L credits may be counted toward the Experiential Learning minimum requirement

3. The following may be taken for upper division elective credit in addition to the 15-17 credits required as stated in 2 above:

ASTR/
BIOL A365  Astrobiology (3)
BIOL/CHEM/PHYS A456  Nonlinear Dynamics and Chaos (3)

BIOL A490  Selected Lecture Topics in Biology (1-3)
BIOL A490L  Selected Laboratory Topics in Biology (1-3)
BIOL A495  Instructional Practicum: Laboratory (1)
BIOL A497  Independent Study in Biology (1-12)
BIOL A498  Individual Research (1-6)
BIOL A499  Senior Thesis (3)

4.3. It is recommended that students complete 8 credits from the following:

GEOL A111  Physical Geology (4)
GEOL A221  Historical Geology (4)
or
PHYS A123  Basic Physics I (3)
and
PHYS A122L  Basic Physics I Laboratory (1)
PHYS A124  Basic Physics II (3)
A total of 124 credits is required for the degree, 42 credits of which must be upper division.

Bachelor of Science, Biological Sciences

The Bachelor of Science degree includes a single core program of coursework with electives selected from 4 sub-disciplines within the biological sciences with two areas of study. Completing courses from the cellular and molecular biology area prepares students for professional careers in areas such as medicine, dentistry, and veterinary science. Completing courses from the organismal, ecology, and evolutionary area prepares students for careers in environmental, organismal, and evolutionary biology. A wide selection of electives is available to all students, including courses offered under BIOL A490, which is a selected topics course. It is imperative that students consult their academic advisors within the Department of Biological Sciences to determine which electives are most appropriate to their career interests. Some of these elective courses are offered periodically, depending on demand. Refer to course descriptions to identify these courses.

Admission Requirements

Complete the Admission to Baccalaureate Programs Requirements in Chapter 7.

Academic Progress

To graduate with a BS in Biological Sciences, the student must complete all courses covered under Major Requirements for a BS in Biological Sciences with a grade of C or better. All prerequisites for Biology courses must be completed with a grade of C or better. Students who audit, or are unable to earn a grade of C or better in, a lower-division (100 or 200 level) course in the Department of Biological Sciences (BIOL) may repeat the course two additional times on a space available basis. Students who audit, or are unable to earn a grade of C or better in, an upper-division (300 or 400 level) course in the Department of Biological Sciences may repeat the course one additional time on a space available basis. Students repeating a course in the Department of Biological Sciences are required to complete all components of that course during the semester in which the course is retaken. When repeating a course with a linked lecture and laboratory component, both components must be repeated. Students enrolled in a laboratory or Experiential Learning course in the Department of Biological Sciences must attend the lab or course the first week of class or they may be administratively dropped.

Graduation Requirements

Students must complete the following graduation requirements:

A. General University Requirements

Complete the General University Requirements for All Baccalaureate Degrees located at the beginning of this chapter.

B. General Education Requirements

Complete the General Education Requirements for Baccalaureate Degrees listed at the beginning of this chapter.

C. College of Arts and Sciences Requirements

Complete the College of Arts and Sciences Requirements listed at the beginning of the CAS section.

D. Major Requirements

1. Some major requirements may also be used to satisfy the College of Arts and Sciences BS requirements.
2. Complete these required support courses (20-36 credits):

5. A total of 122-125 credits is required for the degree, 42 credits of which must be upper division.

**Bachelor of Science, Natural Sciences**

The Department of Biological Sciences also oversees the Bachelor of Science in Natural Sciences. This curriculum emphasizes the interrelationships among the sciences. A program of study in the Natural Sciences requires that students select an option within the degree, and complete all courses required within the option, as well as sufficient science elective courses to meet minimum unit requirements for graduation. Students accepted into this flexible degree program select one of three options: the General Sciences Option is designed for students who are interested in understanding the interrelationships among various scientific fields, or in teaching science at the secondary level. The Pre-Health Professions Option is designed to meet the admission requirements of specific professional schools in medicine, dentistry, and veterinary medicine. The Environmental Sciences Option is designed to prepare students for graduate school or for employment in the private or public sector.

For a complete program description see the Natural Sciences section of this chapter.
Minor, Biological Sciences

Students majoring in another subject who wish to minor in Biological Sciences must complete the following requirements. A total of 28 credits is required for the minor, 12 of which must be upper division.

RE: Changes to the B.S. in Natural Sciences Degree

The Department of Biological Sciences proposes the following changes to the B.S. in Natural Sciences Degree:

1. Changes to the core course requirements
2. Updating upper division course offerings

These changes are being made to update the course requirements and course lists in light of changes the Dept. is making to the B.S. in Biological Sciences curriculum.

Please contact me if you have any additional questions.

The undergraduate program in Natural Sciences is founded on a curriculum that emphasizes the interrelationships among the sciences. A program of study in the Natural Sciences requires that students select an option within the degree and complete all courses required within the option, as well as sufficient science elective courses to meet minimum unit requirements for graduation.

Students accepted into this flexible degree program select one of three options: the General Sciences Option is designed for students who are interested in understanding the interrelationships among various scientific fields, or in teaching science at the secondary level. The Pre-Health Professions Option is designed to meet the admission requirements of specific professional schools in medicine, dentistry, and veterinary medicine. The Environmental Sciences Option is designed to prepare students for graduate school or for employment in the private or public sector.

The Natural Sciences program is administered by the Department of Biological Sciences. Upon acceptance to the major the student will be assigned an academic advisor from the Department of Biological Sciences in accordance with the student’s declared option, and students are strongly encouraged to consult with their academic advisors to determine which electives best suit their career requirements.

**Bachelor of Science, Natural Sciences**

**Admission Requirements**

Complete the Admission to Baccalaureate Programs Requirements in Chapter 7. Declare the major (see Major Requirements) and select one of three options: General Sciences, Pre-Health Professions or Environmental Sciences.

**Program Student Learning Outcomes**

It is expected that graduates of the Natural Sciences program will:

1. Demonstrate their knowledge of central conceptual models used in the major thematic areas of natural sciences.
2. Identify problems, devise solutions and communicate solutions effectively.

**Academic Progress**

To graduate with a BS in Natural Sciences, the student must complete all courses covered under Major Requirements for a BS in Natural Sciences with a grade of C or better. All prerequisites for courses used to meet the Natural Sciences degree requirements must be completed with a grade of C or better. Students who audit a course intended to meet the Natural Sciences degree requirements or who are unable to earn a grade of C or better in the course may repeat the course. Students who audit, or are unable to earn a grade of C or better in, a lower-division (100 or 200 level) course in the Department of Biological Sciences (BIOL) may repeat the course two additional times on a space available basis. Students who audit, or are unable to earn a grade of C or better in, an upper-division (300 or 400 level) course in the Department of Biological Sciences may repeat the course one additional time on a space available basis. Students repeating a course in the Department of Biological Sciences are required to complete all components of that course during the semester in which the course is retaken. When repeating a course with a lecture and laboratory component, both components must be repeated. Students enrolled in a laboratory or Experiential Learning course in the Department of Biological Sciences must attend the lab or course the first week of class or they may be administratively dropped.

**Graduation Requirements**

Students must complete the following graduation requirements:

**A. General University Requirements**

Complete the General University Requirements for All Baccalaureate Degrees located at the beginning of this chapter.
B. General Education Requirements

Complete the General Education Requirements for Baccalaureate Degrees (GERs) listed at the beginning of this chapter.

C. College of Arts and Sciences Requirements

Complete the College of Arts and Sciences (CAS) Requirements listed at the beginning of the CAS section. It is recommended that MATH A200 or MATH A272, STAT A253 or STAT A307, and the computer programming requirements be completed in the first two years of study.

D. Major Requirements

1. To declare the Bachelor of Science in Natural Sciences as their major, students must meet with an advisor and then apply to be accepted into the major. To schedule your advising session, contact the Department of Biological Sciences. At the advising session students are required to:
   a. choose one of the three options and
   b. file a preliminary program of study with the Department of Biological Sciences.
2. It is strongly recommended that any changes to the preliminary program be reviewed by an advisor to ensure that the final program of study will meet all requirements for graduation.
3. Students must submit a final Program of Study-Natural Sciences Degree form signed by their advisor to both the Office of the Registrar and the Department of Biological Sciences during the semester prior to the semester in which they plan to graduate. All courses listed in the Program of Study-Natural Sciences Degree form must be approved by the formal advisor before submitting the form to the Office of the Registrar and the Department of Biological Sciences.
4. No more than 6 credits may come from courses designated as A495, A498 and A499 combined, with no more than 2 credits from A495.
5. No more than 4 credits may be A492, with no more than 2 from the same discipline.
6. Courses not listed as approved for the Natural Sciences degree may be considered by petition, which should be signed by an advisor.
7. A total of 120-124 credits is required for the degree, of which 42 credits must be upper division.

Note 1: It is suggested that the required science sequences for any option be completed in the first two years of study.
Note 2: Students are encouraged to pay careful attention to prerequisite requirements when designing their program of study.
Note 3: Some courses meet more than one of the requirements (GER, CAS, Major). Consult the beginning of this chapter for information about GERs and the beginning of the CAS section for information about CAS requirements.

Environmental Sciences Option (80 credits)

1. Complete the following required courses (28 credits):

   - BIOL A108 Principles and Methods in Biology 6
   - CHEM A105 General Chemistry I 3
   - CHEM A105L General Chemistry I Laboratory 1
   - CHEM A106 General Chemistry II 3
   - CHEM A106L General Chemistry II Laboratory 1
   - GEOL A111 Physical Geology 4
   - GEOL A221 Historical Geology 4
   - ENVI A211 Environmental Science: Systems and Processes 3
   - ENVI A212 Living on Earth: People and the Environment 3

2. Complete an additional 52 credits of degree electives from the approved course lists for the Environmental Sciences Option.
   a. A minimum of 32 credits must be upper division.
b. A minimum of 20 credits must come from the following Natural and Physical Sciences Course List for the Environmental Sciences Option:

- ASTR/
- BIOL A365 Astrobiology (3)
- BIOL/
- GEOL A178 Fundamentals of Oceanography (3)
- BIOL/
- GEOL A179 Fundamentals of Oceanography Laboratory (1)
- BIOL/
- CPLX A200 Introduction to Complexity (3)
- BIOL A242 Fundamentals of Cell Biology (3)
- BIOL A243 Experiential Learning: Genetics and Cell Biology (4)
- BIOL A252 Principles of Genetics (3)
- BIOL A271 Principles of Ecology (3)
- BIOL A273 Experiential Learning: Ecology and Evolution (4)
- BIOL A288 Principles of Evolution (3)
- BIOL A310 Principles of Animal Physiology (3)
- BIOL A316 Principles of Plant Physiology (3)
- BIOL A340 Microbial Biology (3)
- BIOL A342 Experiential Learning: Microbial Biology (4)
- BIOL A403 Experiential Learning: Microscopical Tissue Techniques (6)
- BIOL A406 Experiential Learning: Biostatistics (4)
- BIOL A408 Experiential Learning: Scanning Electron Microscopy (SEM) (6)
- BIOL A415 Comparative Animal Physiology (3)
- BIOL A418 Fish Physiology (3)
- BIOL A423 Ichthyology (3)
- BIOL A427 Marine Invertebrate Biology (3)
- BIOL A430 Marine Mammals and Seabirds (3)
- BIOL A431 Plant Diversity and Evolution (3)
- BIOL A441 Animal Behavior (3)

Liliya Vugmeyster, Associate Professor, lvugmeyster@uaa.alaska.edu.
The undergraduate program in Natural Sciences is founded on a curriculum that emphasizes the interrelationships among the sciences. A program of study in the Natural Sciences requires that students select an option within the degree and complete all courses required within the option, as well as sufficient science elective courses to meet minimum unit requirements for graduation. Students accepted into this flexible degree program select one of three options: the General Sciences Option is designed for students who are interested in understanding the interrelationships among various scientific fields, or in teaching science at the secondary level. The Pre-Health Professions Option is designed to meet the admission requirements of specific professional schools in medicine, dentistry, and veterinary medicine. The Environmental Sciences Option is designed to prepare students for graduate school or for employment in the private or public sector.

The Natural Sciences program is administered by the Department of Biological Sciences. Upon acceptance to the major the student will be assigned an academic advisor from the Department of Biological Sciences in accordance with the student’s declared option, and students are strongly encouraged to consult with their academic advisors to determine which electives best suit their career requirements.

Bachelor of Science, Natural Sciences

Admission Requirements

Complete the Admission to Baccalaureate Programs Requirements in Chapter 7. Declare the major (see Major Requirements) and select one of three options: General Sciences, Pre-Health Professions or Environmental Sciences.

Program Student Learning Outcomes

It is expected that graduates of the Natural Sciences program will:

1. Demonstrate their knowledge of central conceptual models used in the major thematic areas of natural sciences.
2. Identify problems, devise solutions and communicate solutions effectively.

Academic Progress

To graduate with a BS in Natural Sciences, the student must complete all courses covered under Major Requirements for a BS in Natural Sciences with a grade of C or better. All prerequisites for courses used to meet the Natural Sciences degree requirements must be completed with a grade of C or better. Students who audit a course intended to meet the Natural Sciences degree requirements or who are unable to earn a grade of C or better in the course may repeat the course. Students who audit, or are unable to earn a grade of C or better in, a lower-division (100 or 200 level) course in the Department of Biological Sciences (BIOL) may repeat the course two additional times on a space available basis. Students who audit, or are unable to earn a grade of C or better in, an upper-division (300 or 400 level) course in the Department of Biological Sciences may repeat the course one additional time on a space available basis. Students repeating a course in the Department of Biological Sciences are required to complete all components of that course during the semester in which the course is retaken. When repeating a course with a lecture and laboratory component, both components must be repeated. Students enrolled in a laboratory or Experiential Learning course in the Department of Biological Sciences must attend the lab or course the first week of class or they may be administratively dropped.

Graduation Requirements

Students must complete the following graduation requirements:

A. General University Requirements

Complete the General University Requirements for All Baccalaureate Degrees located at the beginning of this chapter.
B. General Education Requirements

Complete the General Education Requirements for Baccalaureate Degrees (GERs) listed at the beginning of this chapter.

C. College of Arts and Sciences Requirements

Complete the College of Arts and Sciences (CAS) Requirements listed at the beginning of the CAS section. It is recommended that MATH A200 or MATH A272, STAT A253 or STAT A307, and the computer programming requirements be completed in the first two years of study.

D. Major Requirements

1. To declare the Bachelor of Science in Natural Sciences as their major, students must meet with an advisor and then apply to be accepted into the major. To schedule your advising session, contact the Department of Biological Sciences. At the advising session students are required to:
   a. choose one of the three options and
   b. file a preliminary program of study with the Department of Biological Sciences.

2. It is strongly recommended that any changes to the preliminary program be reviewed by an advisor to ensure that the final program of study will meet all requirements for graduation.

3. Students must submit a final Program of Study-Natural Sciences Degree form signed by their advisor to both the Office of the Registrar and the Department of Biological Sciences during the semester prior to the semester in which they plan to graduate. All courses listed in the Program of Study-Natural Sciences Degree form must be approved by the formal advisor before submitting the form to the Office of the Registrar and the Department of Biological Sciences.

4. No more than 6 credits may come from courses designated as A495, A498 and A499 combined, with no more than 2 credits from A495.

5. No more than 4 credits may be A492, with no more than 2 from the same discipline.

6. Courses not listed as approved for the Natural Sciences degree may be considered by petition, which should be signed by an advisor.

7. A total of 120-124 credits is required for the degree, of which 42 credits must be upper division.

Note 1: It is suggested that the required science sequences for any option be completed in the first two years of study.

Note 2: Students are encouraged to pay careful attention to prerequisite requirements when designing their program of study.

Note 3: Some courses meet more than one of the requirements (GER, CAS, Major). Consult the beginning of this chapter for information about GERs and the beginning of the CAS section for information about CAS requirements.

Environmental Sciences Option (80 credits)

1. Complete the following required courses (28 credits):
   - BIOL A115 Fundamentals of Biology I 4
   - BIOL A116 Fundamentals of Biology II 4
   - BIOL A108 Principles and Methods in Biology 6
   - CHEM A105 General Chemistry I 3
   - CHEM A105L General Chemistry I Laboratory 1
   - CHEM A106 General Chemistry II 3
   - CHEM A106L General Chemistry II Laboratory 1
   - GEOL A111 Physical Geology 4
   - GEOL A221 Historical Geology 4
   - ENVI A211 Environmental Science: Systems and Processes 3
   - ENVI A212 Living on Earth: People and the Environment 3

2. Complete an additional 52 credits of degree electives from the approved course lists for the Environmental Sciences Option.
   a. A minimum of 32 credits must be upper division.
A minimum of 20 credits must come from the following Natural and Physical Sciences Course List for the Environmental Sciences Option:

- ASTR/
  - BIOL A365 Astrobiology (3)
- BIOL/
  - GEOL A178 Fundamentals of Oceanography (3)
  - GEOL A179 Fundamentals of Oceanography Laboratory (1)
  - CPLX A200 Introduction to Complexity (3)
  - BIOL A242 Fundamentals of Cell Biology (4)
  - BIOL A252 Principles of Genetics (4)
  - BIOL A271 Principles of Ecology (4)
  - BIOL A273 Experiential Learning: Ecology and Evolution (4)
  - BIOL A288 Principles of Evolution (3)
- BIOL A308 Principles of Evolution
- BIOL A309 Biogeography (3)
- BIOL A310 Principles of Animal Physiology (4)
- BIOL A316 Introduction to Principles of Plant Physiology (5)
- BIOL A311 Systematic Botany (4)
- BIOL A312 Biology of Non-Vascular Plants (4)
- BIOL A313 Biology of Vascular Plants (4)
- BIOL A340 General Microbiology/Microbial Biology (5)
- BIOL A342 Experiential Learning: Microbial Biology (4)
- BIOL A403 Experiential Learning: Microscopical Tissue Techniques (6)
- BIOL A406 Experiential Learning: Biostatistics (4)
- BIOL A408 Experiential Learning: Scanning Electron Microscopy (SEM) (6)
- BIOL A410 Biogeography (3)
- BIOL A412 Conservation Biology (3)
- BIOL A423 Ichthyology (4)
- BIOL A426 Ornithology (4)
- BIOL A427 Marine Invertebrate Zoology-Biology (4)
- BIOL A430 Marine Mammals and Seabirds (3)
- BIOL A431 Plant Diversity and Evolution (5)
- BIOL A441 Animal Behavior (4)
- BIOL A442 Experiential Learning: Animal Behavior (3)

MATH A306 Discrete Methods (3)
MATH A314 Linear Algebra (3)
MATH A321 Analysis of Several Variables (3)
MATH A324 Advanced Calculus (3)
MATH A371 Stochastic Processes (3)
MATH A407 Mathematical Statistics I (3)
MATH A408 Mathematical Statistics II (3)
MATH A410 Introduction to Complex Analysis (3)
MATH A422 Partial Differential Equations (3)
MATH A490A Selected Topics in Pure Mathematics (1-3)
MATH A490B Selected Topics in Applied Mathematics (1-3)
MATH A498 Individual Research (1-3)
STAT A253 Applied Statistics for the Sciences (4)
or
STAT A307 Probability and Statistics (4)
STAT A308 Intermediate Statistics for the Sciences (3)
STAT A402 Scientific Sampling (3)
STAT A403 Regression Analysis (3)
STAT A404 Analysis of Variance (3)
STAT A405 Nonparametric Statistics (3)
STAT A407 Time Series Analysis (3)
STAT A408 Multivariate Statistics (3)
STAT A490 Selected Topics in Statistics (1-3)

General Sciences Option (80 credits)

1. Complete the following required courses (32-30 credits):

   BIOC A115 Fundamentals of Biology I 4
   BIOC A116 Fundamentals of Biology II 4
   BIOL A108 Principles and Methods in Biology 6
   CHEM A105 General Chemistry I 3
   CHEM A105L General Chemistry I Laboratory 1
   CHEM A106 General Chemistry II 3
   CHEM A106L General Chemistry II Laboratory 1
   GEOL A111 Physical Geology 4
   GEOL A221 Historical Geology 4
   PHYS A123 Basic Physics I (3) 8
   PHYS A123L Basic Physics I Laboratory (1)
   and
   PHYS A124 Basic Physics II (3)
   PHYS A124L Basic Physics II Laboratory (1)
or
   PHYS A211 General Physics I (3)
   PHYS A211L General Physics I Laboratory (1)
   and
   PHYS A212 General Physics II (3)
   PHYS A212L General Physics II Laboratory (1)

2. Complete an additional 48-50 credits of degree electives 48-50
a. The credits may come from the following course lists:
   i. Environmental Sciences Option Course Lists (above)
   ii. Pre-Health Professions Course Lists (above)
   iii. General Sciences Additional Course List

   ASTR A103  Solar System Astronomy (3)
   ASTR A103L Solar System Astronomy Laboratory (1)
   ASTR A104  Stars, Galaxies and Cosmology (3)
   ASTR A104L Stars, Galaxies and Cosmology Laboratory (1)
   PHYS A311  Intermediate Classical Mechanics (3)
   PHYS/EE A314 Electromagnetics (3)
   PHYS A320  Simulation of Physical Systems (3)
   PHYS/EE A324 Electromagnetics II (3)
   PHYS A413  Statistical and Thermal Mechanics (3)
   PHYS A498  Individual Research (1-6)

b. At least two of the following disciplines must be represented at the upper division level: Astronomy, Biology, Chemistry, Geology, Mathematics, Physics, Statistics.

FACULTY

Lilian Alessa, Professor, lalessa@uaa.alaska.edu
Eric Bortz, Assistant Professor, ebortz@uaa.alaska.edu
C. Loren Back, Professor, clback@uaa.alaska.edu
Jason Barkhead, Assistant Professor, jbarkhead@uaa.alaska.edu
Jennifer Murn Burns, Professor, jmburns@uaa.alaska.edu
Matt Carlson, Associate Professor, mcarlson@uaa.alaska.edu
Douglas Causey, Professor, dcausey@uaa.alaska.edu
Kristine Crossen, Associate Professor, kkcrossen@uaa.alaska.edu
Korya Duddleston, Associate Professor, kduddleston@uaa.alaska.edu
Sarah Gerken, Associate Professor, sargerken@uaa.alaska.edu
Martha Hatch, Associate Professor, jcmah@uaa.alaska.edu
Eric Holmberg, Professor, egholmberg@uaa.alaska.edu
John Kennish, Professor, jmkennish@uaa.alaska.edu
Andrew Kliskey, Professor, akkliskey@uaa.alaska.edu
Jocelyn Krebs, Professor, jkrebs@uaa.alaska.edu
Jerry Kudrow, Professor, jkudrow@uaa.alaska.edu
Miki Li, Assistant Professor, mili@uaa.alaska.edu
Kristine Mann, Professor Emeritus, afkm@uaa.alaska.edu
Jerry Masello, Professor, jmasello@uaa.alaska.edu
Colin McGill, Assistant Professor, cssmcgill@uaa.alaska.edu
Dean Milligan, Professor Emeritus, afdm1@uaa.alaska.edu
LeeAnn Monk, Associate Professor, lamun@uaa.alaska.edu
Terry Naiman, Associate Professor, tnaman@uaa.alaska.edu
James Pantaleone, Professor, jpmontaleone@uaa.alaska.edu
Ann Pasch, Emeritus Professor, ajpasch@uaa.alaska.edu
Kim Peterson, Professor, kpeterson@uaa.alaska.edu
