

# UAA'S AMAZING FACTS

## ABOUT UAA

Surrounded by an environment that is both urban and wild, the University of Alaska Anchorage is a gateway to innovative thinking, learning and exploration. UAA is the state's largest university, situated at the heart of Alaska's largest city, with satellites in Homer, Kodiak, Soldotna, Valdez and Mat-Su. UAA students experience a hands-on education, in and out of the classroom.

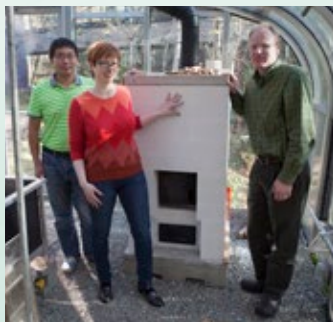

The university offers unique opportunities in academics, research and leadership, as well as real-world experience through community partners locally and globally. UAA's students and faculty come from diverse backgrounds, yet the university community is firmly rooted in Alaska, a place known for its exciting recreation and career opportunities.

monitoring, asset management, surveillance and security, became the first startup company formed in Alaska based upon research by UAA faculty. Two other startups followed: CFT Solutions, which boasts a patent-pending innovation to keep sidewalks ice and snow free, and Cogniceutic Solutions LLC, which is researching and developing nutritional therapies and interventions to improve memory and cognition. UAA has 38 invention disclosures, with 32 patents filed and five patents issued. Alexandra West recently became the first student to earn a place on the UAA Patent Wall of Fame for devising a water-powered fish carcass disposal system that will create a safer environment for people who fish in areas near bear populations.

## Research

Research is central to UAA's mission. Researchers work closely with federal and state scientists in critical areas like fisheries management, climate change and resource extraction, creating cutting-edge field internships and research opportunities for students. UAA established the Innovate awards in 2011 to provide an incentive for innovative research and then launched Seawolf Holdings LLC, establishing a pathway toward commercialization of UAA research. Zensor, a new generation of wireless sensors for remote

## Workforce Development and Education

UAA is a leader in workforce development with informal, almost neighborly, associations to business, state and community leaders. Anchorage is the state's hub for transportation, communications, health care, engineering, trade, service and finance. UAA collaborates with community partners to create efficient programs to meet the needs of these high-demand career fields in

Alaska. Friendly and open access to people, prospects and possibilities empowers students to succeed, knowing they can make a difference here. Our students have a backstage pass to an Alaska way of life that encourages a take-charge attitude and helps develop well-equipped graduates who are curious, motivated and career-ready.

## Student Life

Find your people through UAA's campus organizations and events. Students can choose from more than 100 groups that include cultural, pre-professional, leadership and service groups, and just about any special interest you can think of. Alaska's

beautiful multi-use trails connect campus to the entire city, from the Chugach mountains to Cook Inlet. On campus, UAA has more than doubled its capacity as an athletic and community venue. Fall 2015 marked the opening of the Alaska Airlines

Center, new home to Seawolf Athletics and host to scores of community events and concerts. The Wells Fargo Sports Complex closed for renovations during the summer of 2015, with a scheduled reopening in September 2015. Redesigning this space for more recreational student use will happen in phases. These and campus performance venues are a full ecosystem of opportunity for concerts and lectures, athletic events and art exhibitions. Students at UAA have endless opportunities to socialize and learn from each other.

Centers and Institutes

UAA is home to several centers and institutes in a number of specialized fields, including environmental and natural resources, alcohol and addiction studies, economic education, circumpolar health studies, rural health, human development, social and economic research, justice, biomedicine, community engagement and learning, faculty excellence, economic and small business development, logistics and supply chain integration, psychological services, education policy and Chinese culture.

Degree Programs

UAA offers students many career programs leading to associate, baccalaureate, master's and doctoral degrees as well as vocational and professional certificates in study areas ranging from art and science to education and engineering. Nurse practitioners this fall will be able to start earning a Doctorate of Nursing Practice (DNP) at UAA, enabling them to access the highest level of education in their profession and gain critical expertise necessary to fully participate in policy decisions regarding health care.
