NASA offers professional development and leadership opportunities to students through their Academy and Internship programs.

NASA Summer Internships of up to \$7,300 (+\$1000 travel stipend) will be awarded through a competitive process. Alaska Space Grant sponsors selected students. Students receiving awards in past competitions may apply and receive awards for subsequent competitions.

Students interested in NASA internships will need to apply both to NASA and to the Alaska Space Grant Program for sponsorship potential. Students must apply to our office to be eligible for funding from Space Grant.
