#### ACKNOWLEDGEMENTS

The 1982 Uniform Crime Report for the State of Alaska was compiled from data submitted to the Department of Public Safety from twenty-three law enforcement agencies within Alaska. The excellent cooperation offered the Department of Public Safety by the Chiefs of Police and agency heads is gratefully acknowledged.

Special appreciation is extended to the Federal Bureau of Investigation, Uniform Crime Reporting Section for the assistance provided to the Alaska program.

## CRIME IN ALASKA

The major source of data used to measure the trend and distribution of crime in Alaska is the Uniform Crime Reporting (UCR) Program. Under this program, data is collected by law enforcement agencies as crimes are reported. Seven offense categories, selected because they represent the most common local problems, have been defined as crime index offenses. They are serious both because of their nature and the frequency with which they occur. The offenses of murder, forcible rape, robbery, and aggravated assault comprise the violent crimes. The offenses of burglary, larceny-theft, and motor vehicle theft comprise the property crimes.

The UCR Program was established in 1930 by the International Association of Chiefs of Police (IACP) when the need was recognized for crime statistics through which they could gain a basic understanding of the nature and scope of the nation's crime problem. The FBI took over the responsibility of receiving, tabulating and publishing the crime statistics which are voluntarily submitted by police agencies.

The UCR statistics represent the basis for public awareness of crime and are the major source for a statistical understanding of the local and national crime problem.

The statistics are issued annually during the month of August by the FBI in the publication, Crime in the United States.

The Department of Public Safety was delegated the responsibility for the Alaska Uniform Crime Statistical Program effective June 1, 1982. This program is responsible for accumulating and publishing the statewide crime in Alaska statistics for most major law enforcement agencies within Alaska. Effective with the publication of the 1982 Crime in Alaska, drug statistics for the State of Alaska will be included in the report as well as the annual drug report. Previously, this consolidation of drug data in the crime in Alaska publication has not occurred.

The crime clock should be viewed with care. Being the most aggregate representation of UCR data, it is designed to convey the annual reported crime experience by showing the relative frequency of occurrence of the Index Offenses. This mode of display should not be taken to imply a regularity in the commission of the Part I Offenses; rather, it represents the annual ratio of crime to fixed time intervals.

PART I. CRIME AND POPULATION IN ALASKA

The basic measurements used for crime statistics is the number of Part I crimes per population base. This crime index rate is the number of incidents or crimes per 100,000 inhabitants. Table I is a comparison of the total Part I crimes and rates for Alaska for the period 1980 thru 1982. Table II shows the percentage of changes between 1981 and 1982 in the number of Part I crimes and in the crime index rate. Figure I is a graphical representation of the population growth, total Part I crimes and the total crime rate for Alaska for the 1980 thru 1982 time period.

## LAW ENFORCEMENT OFFICERS KILLED OR ASSAULTED

During 1982, one law enforcement officer was killed and 272 law enforcement officers were assaulted in Alaska. The law enforcement officer killed this year is the first one since 1979. In that year two officers were killed. The total number of assaults has undergone an increase of 16 percent compared to 1981. 100 (37 percent) of these assaults occurred when officers were responding to disturbance calls. 56 (21 percent) occurred when officers were handling/trans-  
porting prisoners. Of the officers assaulted, 59 (22 percent) sustained personal injury, most of these from hands, fists, or feet of the assailant.

The greatest number of assaults took place between 10:01 pm and 12:00 am, midnight. Most assaults occurred to officers assigned to one man vehicles, who were either alone at the time or were assisting other officers. 263 (97 percent) of assaults to police officers were cleared by arrest.

The 1981 national rate for law enforcement personnel is two officers for each 1000 United States inhabitants. In Suburban areas, the national average is 2.2 officers per 1000 population. In Alaska, for 1982, the rate is 2.2 officers, per 1000 population. It is significant that the varying demographics and jurisdictional characteristics affect the requirements for law enforcement personnel allocations in Alaska. Because of differing service requirements and responsibilities, care should be used when attempting any comparisons of employee rates.

## DRUG ENFORCEMENT INFORMATION

### DATA COLLECTION

Statistics and data pertaining to the Statewide Drug Enforcement program is a compilation of the FBI's Uniform Crime Report (UCR) information collected and compiled by the Department of Public Safety, the State Troopers Drug Enforcement Unit's individual reports and information from local police departments.

All local Alaska police departments enforce drug laws as do the Alaska State Troopers and the federal law enforcement agencies in Alaska. However, not all of these agencies report information to the UCR program, which is compiled by the Department of Public Safety. Twenty-three (23) of the twenty-six (26) local police departments plus the Alaska State Troopers contributed data for 1982. Some smaller local police departments did not participate in the UCR data system. It should be noted that these agencies experience very few drug problems which do not involve one of the state drug enforcement units or one of the large police departments. These state drug enforcement units, or Alaska State Troopers, are usually contacted on any significant Alaska drug cases which involve federal law enforcement officers. Thus a comprehensive report of drug activity in Alaska is available by a critical review and assimilation of the data reported by the agencies participating in the UCR program along with the verifiable statistical data of non-UCR participating enforcement agencies.

The continuing goal of the Department of Public Safety is to establish a comprehensive report of total enforcement in Alaska.

## STATISTICAL OVERVIEW

The drug enforcement information for Alaska is the result of a dedicated effort to consolidate the complex reporting data involved in drug statistics. Drug trafficking and distribution are world-wide activities involving numerous persons. Drug Enforcement for the same reason is, and must continue to be a cooperative effort often involving many different agencies. The results detailed in the enclosed figures and tables are designed to be readily discernible by those reviewing the report. However, it should be noted that many police agencies and departments may be involved with an arrest or seizure listed in any particular region or agency. The main thrust of this report is to illustrate the primary area or jurisdiction in which a seizure or arrest occurred. In addition, the drug arrests or seizures which resulted from a cooperative effort of: Drug Enforcement Units, Police Departments, Federal Agencies and State Troopers, were tabulated under the Special Drug Enforcement Unit involved. This methodology was designed to eliminate duplication of information and in no way detracts from the dedicated efforts by an agency involved.

It should be apparent that the true measurement of drug activity and investigative results is not readily available by simply adding the statistics furnished by the different enforcement agencies. This report has screened out duplicative information to the extent possible and efforts continue to further refine drug reporting in Alaska.

The Department of Public Safety was delegated the responsibility for the Alaska Uniform Crime Statistical Program effective June 1, 1982. This Program is responsible for accumulating and publishing the statewide Alaska statistics for most major law enforcement agencies in Alaska. Effective with the publication of the "1982 Crime in Alaska", all drug statistics for the State of Alaska are included in the report as well as the Department of Public Safety "Annual Drug Report". Previously, this consolidation of drug data has not occurred.

The following two figures use certain common terms, which are explained, as follows:

NUMBER OF ARRESTS - Actual number of individuals arrested, cited or summoned for drug violations during the period specified.

OFFENSE CHARGE - The basic charges used to describe the drug offense. The general charge categories are detailed below:

SALE/NARCOTICS - Possession for sale or criminal activity relating to sale of opium, heroin, morphine, cocaine, codeine or related drugs.

SALE/MARIJUANA - Possession for sale or criminal activity relating to sale of hashish, marijuana or other related drugs.

SALE/SYNTHETIC NARCOTICS - Possession for sale or criminal activity relating to sale of methadone, demerol or related drugs.

SALE/DANGEROUS DRUGS - Possession for sale or criminal activity relating to sale of barbiturates, amphetamines, benzedrine, hallucinogens, tranquilizers, LSD or related drugs.

USE/NARCOTICS - Possession for use, furnish, transport, manufacture, cultivate or obtain unlawfully: opium, heroin, morphine, cocaine, codeine or related drugs.

USE/MARIJUANA - Possession for use, furnish, transport, manufacture, cultivate or obtain unlawfully: hashish, marijuana or other related drugs.

USE/SYNTHETIC NARCOTICS - Possession for use, furnish, transport, manufacture, cultivate or obtain unlawfully: methadone, demerol or other related drugs.

USE/DANGEROUS DRUGS - Possession for use, furnish, transport, manufacture, cultivate, obtain unlawfully: barbiturates, amphetamines, benzedrine, hallucinogens, tranquilizer, LSD or other related drugs.

NUMBER OF ARRESTS UNDER 18 - Juvenile drug offenders arrested up to, but not including 18 years old at time of offense.

NUMBER OF ARRESTS 18 OR OVER - Drug offenders 18 or older at time of offense.

TOTAL DRUG CASES INVESTIGATED - Number of drug-related offenses or cases reported for the period specified.

PERCENTAGE (%) CHANGE COMPARED TO PREVIOUS YEAR - This percentage figure compares the current year value against the previous year and can be either positive (+) if increasing, or negative (-) if decreasing. The formula for this percentage comparison is:

$$\% \text{ Change for } = \frac{(\text{Current Yr. Value}) - (\text{Previous Yr. Value})}{\text{Previous Year Value}} \times 100$$

DRUG SEIZURE - Amount of drugs seized during the reporting period. The standard reporting units used for seizure of drugs is as follows:

- a. HEROIN - Weight in grams with a relative purity specified. (100% maximum)
- b. COCAINE - Weight in grams with a relative purity specified. (100% maximum)
- c. HASHISH - Weight in grams.
- d. MARIJUANA - Weight in pounds or ounces.
- e. PHARMACEUTICAL DRUGS - Dosage unit for specified drug.

DRUG VALUE - The street value of the specified drug seized. This value is determined as a state-wide value based on the volume of the drug on the illicit state market during the period specified. It should be noted that a drug purchased in large quantities which is relatively pure will have a street value far in excess of the initial price paid for the drug.

For computation purposes, the breakdown prices that determine street value are as follows:

Marijuana - Per Ounce	\$150.00
LSD - Per Tablet	5.00
Amphetamines - Per Hundred	300.00
Heroin - Per Gram (assumed 4% pure)	150.00
Cocaine - Per Gram (assumed 30% pure)	125.00
Hashish - Per Gram	10.00

#### Example of Calculation

An example of establishment of the street value for drugs is outlined below. In this instance 2,081 grams of cocaine (80% pure) were seized in Anchorage. When this relatively pure cocaine is adulterated or reduced to street value purity (30%), it would result in 5550 grams of 30% cocaine (2,081 grams x 80%/30%). The 5,550 grams of reduced cocaine is then valued on the street at \$693,750.00 (5,550 grams x \$125/gram).
