**If no professional social workers are available,** is your agency willing to sign an agreement with a volunteer professional social worker outside of your organization to supervise the student(s), in addition to on-site supervision provided by your staff?

yes            no

## Comments

**Learning Opportunities:** Social work field education helps prepare the student for professional social work practice. Describe the professional level learning opportunities your organization can offer a student learner. This would include a description of each agency or program/service the student could be a part of, including a "job description" listing activities that he or she would perform. Also identify the Field Instructor or Supervisor.

**Requirements:** Identify any established agency requirements or procedures required of field students. (Examples: use of a car, work hours, mandatory staff meeting times, security / background / driving checks, expected knowledge / past experience, etc.)

**Considerations:** Identify any unique risks or factors a student might encounter during field education with your agency. (Examples: aggressive / assaultive clients, exposure to communicable diseases, travel in small aircraft, home visits in high risk areas, etc.)
