

## **AY20 Expedited Program Review Recommendations**

**Program Review:** Applied Geological Sciences (MS)

**Programs Included:** MS Applied Geological Sciences

1. Explore with industry opportunities for an endowed professorship and sustainable financial support for the long term.
2. Explore ways to close the fiscal gap and rely far less on state appropriations through CAS's budget. Perhaps the MS program can implement a tuition surcharge; alter faculty workloads so that fewer contingent faculty are needed; and/or foundations can be established for an endowed chair position.
