

AY20 Expedited Program Review Recommendations

Program Review: Architectural and Engineering Tech (AAS)

Programs Included: AAS Architectural and Engineering Technology

1. Review the course rotation and semester offerings, reduce the number of sections offered each semester, and increase course capacity to reduce cost and increase revenue.
2. Engage in efforts to recruit students, particularly those from secondary schools that offer drafting or construction programs.
3. Continue to use existing courses and faculty from related programs to keep costs low.
4. Work with Institutional Research to try to understand the post-award enrollment patterns of the program's students.
5. Monitor the progress of enrolled students and offer support as needed to ensure they can complete their degrees.
