Double Majors for AAS Programs

Associate of Applied Science degrees are intended to provide specialized education. Therefore, they do include a major specialty and students may earn more than one AAS.

Associate of Applied Science degree-seeking students may apply to graduate (during the same semester) with two majors. For example, a student may select two areas from the approved majors within the AAS degree program (such as Welding and Automotive Technology). Students must apply and be accepted into each major program. Students may request a double major at the time of initial admission to UAA or add a major at a later date through the Change of Major degree process. Forms are available on the Office of the Registrar's website (<http://www.uaa.alaska.edu/records/registrarforms.cfm>). Students must satisfy the General University Requirements, the General Course Requirements and both sets of major requirements.

Students may elect to graduate under the requirements of any catalog in effect (<http://catalog.uaa.alaska.edu/academicpoliciesprocesses/academicstandardsregulations/catalogyear>) during the five years after formal acceptance to the program.

A double major is not applicable to the Associate of Arts degree.

General Course Requirement Classification List for AAS Degrees

These General Course Requirements are designed to ensure that all students graduating with AAS degrees have demonstrated fundamental written and oral communication skills and have successfully performed at the collegiate level in at least one of the listed discipline areas (humanities, mathematics, natural science or social science).

The design of AAS degrees, like that of undergraduate certificates, ensures further that students gain some proficiency in essential skills of communication, computation and human relations. Graduates of AAS degrees shall be able to meet the following Student Learning Outcomes applicable to these areas of related instruction:

- Communicate effectively.
- Analyze empirically.
- Relate cooperatively.
- In the absence of

specific required courses in these areas, the degrees address these topics in the program requirements and measure student performance in those classes.
