

**2021 ANNUAL ACADEMIC ASSESSMENT REPORT FORM
(Due October 15 to the dean)**

The Faculty Senate Academic Assessment Committee (AAC) is committed to a vision of assessment that leads to continuous program improvements and benefits students. Annual assessment reporting informs decision making and resource allocation aimed at improving student learning and success. It also enables the AAC to analyze assessment across the institution and to respond to UA System, Board of Regents, legislative, and Northwest Commission on Colleges and Universities (NWCCU) requests. We thank you for your continued support of and participation in this annual activity.

Starting in Spring 2021, UAA is moving to one academic assessment reporting mechanism. The below form merges and streamlines the former Annual Academic Assessment Survey and the Annual Academic Assessment Report. It also incorporates questions about how academic programs contribute to student achievement of institutional core competencies and to student success.

This annual report will be due to the dean on October 15. Programs with suspended admissions and new programs in the first year of implementation are not required to complete this form.

These reports are public documents and will be posted on the assessment website. Responses are to be narrative only, and must be ADA and FERPA compliant. Do not embed any links, including to webpages or other documents. To be FERPA compliant, do not include the names of any current or former students. Rather, use statements such as, "In AY21 four program graduates were accepted to graduate programs in the field." Programs with specialized accreditation or other external recognitions must comply with restrictions regarding what can be published, as per the accreditor or external organization. Do not include appendices. Appendices to this form will not be accepted.

The form uses narrative, text, and drop-down boxes. Narrative boxes have a character limit, which includes spaces. When using text and drop-down boxes, if you want to undo an answer, press "Control-Z" or "Command-Z."

For technical assistance with this form, email Academic Affairs (uaa.oaa@alaska.edu).

PROGRAM SECTION (Due to the dean on October 15)

After completing the Program Section, the program should email this form to the dean, with a copy to the appropriate community campus director(s) if the program is delivered on a community campus.

Submission date: Select date.

Submitted by: T.J. Miller, Chair HPER

Program(s) covered in this report: Kinesiology BS

(Programs with suspended admissions and new programs in the first year of implementation are not required to complete this form.)

If you selected "Other" above, please identify. *(100 characters or less)*

College: College of Health

Campuses where the program(s) is delivered: Anchorage KOD KPC MSC PWSC

Specialized accrediting agency (if applicable): Select Specialized Accrediting Agency or N/A.

If explanation is necessary, such as only some of the certificates and degrees are covered by the specialized accreditation, briefly describe: N/A

INSTITUTIONAL STUDENT LEARNING CORE COMPETENCIES

In 2020, UAA launched a consensus-based, deliberative process to identify the key skillsets that help students achieve academic and post-graduation success. After a year-long process that included students, faculty, staff, administrators, alumni, and employers, the UAA community identified four "core competencies" at the heart of a quality UAA education. Students develop mastery of these competencies through curricular (e.g., courses), co-curricular (e.g., internships, conferences), and extra-curricular (e.g., student clubs) learning experiences.

After the stakeholder-based process in AY20, UAA conducted a pilot project focusing on the core competency of Personal, Professional, and Community Responsibility (PPCR). This decision was based on input from the 2020 Annual Academic Assessment Retreat.

Question #1 below is designed to engage program faculty in thinking about how they can or already do promote student learning in this core competency.

1. Personal, Professional, and Community Responsibility: The knowledge and skills necessary to promote personal flourishing, professional excellence, and community engagement.

- **What would you hope a student would say if asked where in your program or support service they had the opportunity to develop proficiency in this Core Competency? (500 characters or less)**

HPER hosts multiple community engaged courses (KIN 280 series, KIN 295A/395 Practicum courses, KIN A386, KIN A484). Due to COVID 19 this past year, we did not have near as many opportunities for student community engagement. The KIN 495

Internship course, a 240 hour, place-based mentored experience was also slightly different his year. Kinesiology students have ample opportunities to practice this competency.

- **Do you have an example that could be a model for the university of an intentionally designed course, assignment, or activity that showcases the student learning in this core competency?** Yes No

If yes, please briefly describe. (500 characters or less)

Positive Leadership for Active Alaska Youth (PLAAY; www.plaay.org). In partnership/collaboration with many Alaska organizations (Healthy Futures, GCI, ANTHC, Special Olympics, former Olympic Athletes, local Athletes, etc.) HPER students design exercise routine(s) that is simulcast all over the world to engage youth/school children in 30 minutes of simultaneous exercise/physical activity.

- **Do you have any ideas about where your program or the university might develop other intentionally designed opportunities for students to develop proficiency in this core competency?** Yes No

If yes, please briefly describe. (500 characters or less)

We feel our community engaged courses, practicums, internships and our intentional curriculum design present ample opportunity for this learning outcome to be realized.

PROGRAM STUDENT LEARNING OUTCOMES

2. Please list the Program Student Learning Outcomes your program assessed in AY21. For each outcome, indicate one of the following: Exceeded faculty expectations, Met faculty expectations, or Did not meet faculty expectations.

Example: Communicate effectively in a variety of contexts and formats – Exceeded faculty expectations.

Program Student Learning Outcomes

At the completion of this program, Bachelor of Science in Kinesiology, students are able to:

- 1) Apply kinesiology related concepts, theories, and frameworks to health, wellness, and quality of life. Met faculty expectations
- 2) Critically evaluate research related to physical activity and its impact on health and chronic disease. Met faculty expectations
- 3) Design, implement and evaluate physical activity programs based on relevant standards and research that promote health and quality of life for diverse populations. Met faculty expectations
- 4) Demonstrate effective leadership skills in varied contexts Met faculty expectations
 - a) Writing Outcomes
 - b) Selecting Appropriate Activities including Progression, Modification and Variation
 - c) Motivational Activities
 - d) Venue Selection and Suitability

e) Safety/Risk Management

5) Advocate for and demonstrate the importance of a physically active lifestyle personally and professionally as a means to improve quality of life and reduce the risk and prevalence of lifestyle related diseases. Met faculty expectations.

3. Describe your assessment process in AY21 for these program student learning outcomes, including the collection of data, analysis of data, and faculty (and other, e.g., advisory board) conversations around the findings. (750 characters or less)

The Kinesiology Assessment plan was brand new for AY2021. Since we were all remote, I would say there was little data collection because of the experiential nature of our measures. Faculty could not place students in community settings or practice our core competencies during COVID.

4. What are the findings and what do they tell the faculty about student learning in your program? (750 characters or less)

HPER Faculty are still assessing utilization of the assessment plan and data. As stated above, with COVID 19, community placement/interaction was challenging. We did collect some artifacts pertaining to the PSLO's. The leadership rubric is consistently applied in our Leadership courses (5 courses). We also collected data from the internship course. Initially this data shows that HPER Faculty selected meaningful measures of student learning and Kinesiology students are meeting or exceeding our PSLO's. With the new PSLO's, revised courses, and a revised degree core, we will continue to track student learning and collecting artifacts. I feel this year HPER will have substantive data to further review the PSLO's and attainment.

5. Based on the findings, did the faculty make any recommendations for changes to improve student achievement of the program student learning outcomes? Please describe the recommended action, what improvement in student learning the program hopes to see with this change, the proposed timeline, and how the program will know if the change has worked. If no recommendations for changes were made, please explain that decision. (750 Characters or less)

I do not have any information as this was our first year with new PSLO's, utilizing this assessment plan and collecting artifacts. HPER does not feel the need to change anything at this time, we changed everything in the last year. We need to stay the course and collect data for this year. The HPER will embark on a review of the PSLO's and assessment plan/data.

PROGRAM IMPROVEMENTS AND ASSESSING IMPACT ON STUDENT LEARNING

6. In the past academic year, how did your program use the results of previous assessment cycles to make changes intended to improve student achievement of the program student learning outcomes? Please check all that apply.

- Course curriculum changes
- Course prerequisite changes

- Changes in teaching methods
- Changes in advising
- Degree requirement changes
- Degree course sequencing
- Course enrollment changes (e.g., course capacity, grading structure [pass/fail, A-F])
- Changes in program policies/procedures
- Changes to Program Student Learning Outcomes (PSLOs)
- College-wide initiatives (e.g., High Impact Practices)
- Faculty, staff, student development
- Other
- No changes were implemented in AY21.

If you checked "Other" above, please describe. (100 characters or less)

- 7. Do you have any information about how well these or other past improvements are working? Are they achieving their intended goals? Please include any data or assessment results that help you demonstrate this. (750 characters or less)**

I do not have any information as this was our first year with new PSLO', utilizing this assessment plan and collecting artifacts.

STUDENT SUCCESS AND THE CLOSING OF EQUITY GAPS

Programs are not required to respond to question #8 below for their report due on October 15, 2021. Question #8 will be required for the next round and moving forward.

- 8. Respond to at least one of the following metrics. Student success depends on many aspects of a student's experience. On the academic program level, it can relate to correct placement, course sequencing, standardized pre-requisites, the intentional use of high impact practices, proactive advising, course scheduling practices, etc. UAA is using the following two metrics in its cyclical Program Review process, as well as in its reaffirmation of accreditation process. These data are included in the most recent IR-Reports Program Review dashboard. Please review these data for your program, note any equity gaps, and describe steps you are taking or plan to take to close those gaps.**

Metric	Definition	Rationale
JUNIOR GRADUATION RATE - BACCALAUREATE	The percentage of students who graduate with a bachelor's degree within four years of first reaching junior class status (60 credits). <i>Data source: RPTP end-of-term</i>	Junior graduation rate (after 60 credits) can reflect a department's success in helping students complete their degrees. Within their first 60 credits, students typically

Metric	Definition	Rationale
	<i>freeze files. Disaggregate as per accreditation.</i>	focus on completing GERs and often switch majors. Tracking how long it takes students to complete their degrees after 60 credits, when many students have likely committed to a specific major, can provide actionable information for departments.
COURSE PASS RATES BY COURSE LEVEL (Undergraduate lower-division, undergraduate upper-division, and graduate).	The percentage of students who receive a passing grade (A, B, C, P) for all undergraduate students and (A, B, P) for graduate students in a course offered by a program compared to the same rate calculated for all courses at that level. Based on a 5-year trend. Included in the denominator for undergraduate courses are the grades D, F, W, I, NP, NB. Included in the denominator for graduate level are the grades C, D, F, W, I, NP, NB. Discipline acts as a proxy for a program. <i>Data source: RPTP end-of-term freeze files. Disaggregate as per accreditation.</i>	Low pass rates are one critical way to identify courses that are barriers to student success and degree completion. Failing key courses correlates with low retention and more major switching. Mitigation strategies can be internal or external to the course itself, including, among other things, the use of high-impact pedagogical practices, appropriate placement, course sequencing, tutoring, and other means to ensure student success within a particular course. This metric and the disaggregation of the data can inform planning, decision making, and the allocation of resources to programs and services designed to mitigate gaps in achievement and equity.

9. **Do you have any examples of post-graduate success you want to highlight? For example, major scholarships, the percent of students who pass licensure examinations, the percent of students accepted to graduate programs, the percent in post-graduation employment in the field or a related field. (750 characters or less)**

We have recently seen success from our HPER alumna. Recently two student have admitted, one graduated, into the Creighton Partner program for Occupational Therapy. We have had a few Doctor of Physical Therapy (kinesiology undergrad) graduates (5), 2 graduates in a graduate Athletic Training program, and many student receive employment offers upon graduation. I do not have percentages for this report.

DEAN SECTION (Due to the program on January 15)

After completing the Dean Section and signing it, the dean should email this form to the program, and

copy uaa_oaa@alaska.edu for posting. If the program is delivered on one or more community campus, the dean should consult with the appropriate community campus director(s) on the response and copy the appropriate community campus director(s) when emailing the response to the program.

1. Based on the program's responses above, what guidance and support do you have for the program moving forward? Is there a particular area the program should focus on? (750 characters or less)

The program has made significant changes to curriculum and the assessment plan which they will have more data on in the upcoming year. As the COVID-related challenges in community placements and, in some cases, curriculum delivery have extended for a relatively long period of time, it will be important that the program is able to articulate how student achievement is being assessed within the limitations of various restrictions. The program has a solid assessment plan that includes both summative and formative assessment measures within the program. Collection and analysis of data generated from the tools in the plan will be valuable in identifying areas for program growth/improvement. Formal student feedback could be a valuable addition.

2. Is there something the program is doing particularly well in terms of its processes for the assessment and improvement of student learning, including the closing of equity gaps, that might serve as a model for other programs? If yes, please explain. You may skip this question. (750 characters or less)
