

**2022 ANNUAL ACADEMIC ASSESSMENT REPORT FORM  
(Due October 15 to the dean)**

The Faculty Senate Academic Assessment Committee (AAC) is committed to a vision of assessment that leads to continuous program improvements and benefits students. Annual assessment reporting informs decision making and resource allocation aimed at improving student learning and success. It also enables the AAC to analyze assessment across the institution and to respond to UA System, Board of Regents, legislative, and Northwest Commission on Colleges and Universities (NWCCU) requests. We thank you for your continued support of and participation in this annual activity.

Starting in Spring 2021, UAA moved to one academic assessment reporting mechanism. The below form merges and streamlines the former Annual Academic Assessment Survey and the Annual Academic Assessment Report. It also incorporates questions about how academic programs contribute to student achievement of institutional core competencies and to student success.

**This annual report will be due to the dean on October 15. Programs with suspended admissions and new programs in the first year of implementation are not required to complete this form.**

These reports are public documents and will be posted on the assessment website. Responses are to be narrative only, and must be ADA- and FERPA-compliant. Do not embed any links, including to webpages or other documents. To be FERPA-compliant, do not include the names of any current or former students. Rather, use statements such as, "In AY22 four program graduates were accepted to graduate programs in the field." Programs with specialized accreditation or other external recognitions must comply with restrictions regarding what can be published, as per the accreditor or external organization. Do not include appendices. Appendices to this form will not be accepted.

The form uses narrative, text, and drop-down boxes. Narrative boxes have a character limit, which includes spaces. When using text and drop-down boxes, if you want to undo an answer, press "Control-Z" or "Command-Z."

*Note:* To ensure the fillable fields function correctly, the form must be completed in Microsoft Word. It will not function properly in Google Docs. Programs that wish to record collaborative discussion of the report might consider creating a separate document to take notes, before entering final responses in the official fillable form.

For technical assistance with this form, email Academic Affairs ([uaa.oaa@alaska.edu](mailto:uaa.oaa@alaska.edu)).

---

### PROGRAM SECTION (Due to the dean on October 15)

*After completing the Program Section, the program should email this form to the dean, with a copy to the appropriate community campus director(s) if the program is delivered on a community campus.*

**Submission date:** 10/21/2022

**Submitted by:** Lisa Ernest, Chair of Undergraduate Programs, llernest@alaska.edu

**Program(s) covered in this report:** Nursing BS

*(Programs with suspended admissions and new programs in the first year of implementation are not required to complete this form.)*

If you selected "Other" above, please identify. (100 characters or less)

**College:** College of Health

**Campuses where the program(s) is delivered:**  Anchorage  KOD  KPC  MSC  PWSC

**Specialized accrediting agency (if applicable):** Select Specialized Accrediting Agency or N/A.

**If explanation is necessary, such as only some of the certificates and degrees are covered by the specialized accreditation, briefly describe:** Accreditation Commission for Education in Nursing (ACEN)

### INSTITUTIONAL STUDENT LEARNING CORE COMPETENCIES

In 2020, UAA launched a consensus-based, deliberative process to identify the key skillsets that help students achieve academic and post-graduation success. After a year-long process that included students, faculty, staff, administrators, alumni, and employers, the UAA community identified four core competencies at the heart of a quality UAA education. Students develop mastery of these competencies through curricular (e.g., courses), co-curricular (e.g., internships, conferences), and extra-curricular (e.g., student clubs) learning experiences.

After the stakeholder-based process in AY20, UAA is phasing in the integration of the core competencies into ongoing processes, including program student learning outcomes assessment. Personal, Professional, and Community Responsibility (PPCR) was integrated into the AY21 Annual Academic Assessment Report. The AY22 Annual Academic Assessment Report now also integrates Effective Communication.

Question #1 below is designed to engage program faculty in thinking about how they can or already do promote student learning in these two core competencies.

1. **A. *Personal, Professional, and Community Responsibility: The knowledge and skills necessary to promote personal flourishing, professional excellence, and community engagement.***

- **If last year you provided your program's current or planned example of an intentionally designed course, assignment, or activity that develops and showcases the student learning in this core competency, please discuss that implementation and any observations you have regarding how well it is working. (500 characters or less)**

N/A

- **If last year you *did not* identify a current or planned example of an intentionally designed course, assignment, or activity that provides students the opportunity to develop and showcase this core competency, please identify one now. (500 characters or less)**

NS A474P Nursing Practicum Immersion course exemplifies the core competencies of promoting personal flourishing and professional excellence. As a fully immersive practicum experience, students have the opportunity to thoroughly engage in the role of the professional nurse prior to graduation. The student completes 135 clinical hours with a Registered Nurse preceptor. This course supports nursing students' skill development and personal growth, and engages them in their chosen profession.

**B. *Effective Communication: The knowledge and skills necessary to engage in effective communication in diverse contexts and formats.***

- **What would you hope a student would say if asked where in your program or support service they had the opportunity to develop proficiency in this core competency? (500 characters or less)**

I would hope that students would state that they have ample opportunity to engage in effective communication throughout the BS Nursing program while they are in the classroom, skills lab, clinical settings, and also in simulation experiences.

- **Provide your program's current or planned example(s) of an intentionally designed course, assignment, or activity that showcases the student learning in this core competency. (500 characters or less)**

In NS A332/L/P students engage in learning activities in the theory course that focus on therapeutic communication. During their lab, students have further opportunity to practice these skills. This includes using the SBAR (Situation-Background-Assessment-Recommendation) technique that is widely used in health care. Students have scenarios incorporating communication techniques and faculty assess student learning through direct observation of their communications using a clinical checkoff.

## PROGRAM STUDENT LEARNING OUTCOMES

2. Please list the Program Student Learning Outcomes your program assessed in AY22. For each outcome, indicate one of the following: Exceeded faculty expectations, Met faculty expectations, or Did not meet faculty expectations.

*Example: Communicate effectively in a variety of contexts and formats – Exceeded faculty expectations.*

Demonstrate clinical reasoning by making evidence-based nursing judgements through the use of intellectual, interpersonal, and technical competencies to promote safe and effective client-centered care. Met Faculty Expectations

3. Describe your assessment process in AY22 for these Program Student Learning Outcomes, including the collection of data, analysis of data, and faculty (and other, e.g., advisory board) conversations around the findings. (750 characters or less)

During AY22 faculty identified that UAA undergraduate programs needed to incorporate a clinical judgment model into our curricula, since that was lacking and some students struggled to use critical thinking skills and develop clinical reasoning. The curriculum committee was reestablished in Spring 22, and unanimously selected Tanner's Clinical Judgment Model. They began planning how to implement the model in both clinical and didactic courses, and discussed evidence-based approaches to using this framework to facilitate students' developing clinical reasoning.

4. What are the findings and what do they tell the faculty about student learning in your program? (750 characters or less)

This model is being integrated into our curriculum in AY23. The National Council of State Boards of Nursing has recommended that all undergraduate nursing programs implement a clinical judgment model into their curricula in order to better prepare new nurses to develop and use clinical judgment to improve patient outcomes. Faculty anecdotally reported that the model is a helpful framework for students that is easy to use in both the classroom and during clinical activities.

5. Based on the findings, did the faculty make any recommendations for changes to improve student achievement of the Program Student Learning Outcomes? Please describe the recommended action, what improvement in student learning the program hopes to see with this change, the proposed timeline, and how the program will know if the change has worked. If no recommendations for changes were made, please explain that decision. (750 Characters or less)

As the model is currently being implemented, we will continue gathering data from faculty and students, as well as assessing if students' clinical judgment improves through faculty and preceptor direct observation, structured student learning activities, and by student performance on future national licensure examinations (NCLEX) as clinical judgment will be a greater part of the NCLEX beginning in spring 2023. Collecting this data is a focus of our evaluation committee.

## PROGRAM IMPROVEMENTS AND ASSESSING IMPACT ON STUDENT LEARNING

**6. In the past academic year, how did your program use the results of previous assessment cycles to make changes intended to improve student achievement of the Program Student Learning Outcomes? Please check all that apply.**

- Course curriculum changes
- Course prerequisite changes
- Changes in teaching methods
- Changes in advising
- Degree requirement changes
- Degree course sequencing
- Course enrollment changes (e.g., course capacity, grading structure [pass/fail, A-F])
- Changes in program policies/procedures
- Changes to Program Student Learning Outcomes (PSLOs)
- College-wide initiatives (e.g., High-Impact Practices)
- Faculty, staff, student development
- Other
- No changes were implemented in AY22.

**If you checked "Other" above, please describe. (100 characters or less)**

**7. Do you have any information about how well these or other past improvements are working? Are they achieving their intended goals? Please include any data or assessment results that help you demonstrate this. (750 characters or less)**

We are continuing to evaluate past and present SON academic assessment infrastructure, plans, and processes with our academic assessment consultant from Nursing Education Connections, LLC. Faculty are working with the consultant in developing a Systematic Plan of Evaluation that meets UAA assessment standards and practices, and meets ACEN accreditation standards and Alaska Board of Nursing Regulations. New assessment methods are being developed and proposed by our evaluation committee for future implementation. Data collection will begin with AY23.

## STUDENT SUCCESS AND THE CLOSING OF EQUITY GAPS

Student success depends on many aspects of a student's experience. On the academic program level, it can relate to correct placement, course sequencing, standardized pre-requisites across sets of courses, the intentional use of high-impact practices, proactive advising, course scheduling practices, etc.

UAA has selected the below metrics as student success metrics for accreditation.

In response to faculty questions and concerns about reporting on these data without more discussion and training, we will spend AY23 exploring together what equity data are and are not, how they can be used responsibly, and what programs can do to close equity gaps in student achievement on the below metrics, as well as to improve overall student achievement on them. UAA has a team participating in the NWCCU Data Equity Fellowship, and that team will help to guide these conversations.

**8. PROGRAMS ARE NOT REQUIRED TO RESPOND TO QUESTION #8 FOR THEIR REPORT DUE ON OCTOBER 15, 2022. IT IS HERE JUST FOR THEIR REFERENCE. Describe the actions your program is taking to improve student achievement on one or more of the following metrics. Also, describe any resulting improvements in student learning.**

Metric	Definition	Rationale
UNDERGRADUATE COURSE PASS RATES BY COURSE LEVEL (Undergraduate lower-division, undergraduate upper-division).	The percentage of students who receive a passing grade (A, B, C, P) for all undergraduate students in a course offered by a program compared to the same rate calculated for all courses at that level. Based on a 5-year trend. Included in the denominator for undergraduate courses are the grades D, F, W, I, NP, NB. <i>Data source: RPTP end-of-term freeze files. Disaggregate as per accreditation.</i>	Low pass rates are one critical way to identify courses that are barriers to student success and degree completion. Failing key courses correlates with low retention and more major switching. Mitigation strategies can be internal or external to the course itself, including, among other things, the use of high-impact pedagogical practices, appropriate placement, course sequencing, tutoring, and other means to ensure student success within a particular course. This metric and the disaggregation of the data can inform planning, decision making, and the allocation of resources to programs and services designed to mitigate gaps in achievement and equity.
ANNUAL RETENTION 1 <sup>ST</sup> TO 2 <sup>ND</sup> FALL	Traditional measure of the % of first-time, full-time associate and baccalaureate degree-seeking freshmen who enter in a given fall term and return the following fall. <i>Data source: UA System Warehouse RPTP/DEDMGR end-of-term freeze files. Disaggregate as per accreditation on an annual basis.</i>	Following the student from the 1 <sup>st</sup> fall to 2 <sup>nd</sup> fall can indicate ongoing connections and support inside and outside of the classroom are motivating students to return to continue their studies at the institution. Continuing enrollment is a key factor in completion.
SEMESTERS TO DEGREE – GRADUATE PROGRAMS	The average number of semesters taken by students to complete any graduate degree or graduate certificate program. Determined by students who have graduated	Looking at the number of semesters graduate students take to complete their degrees illustrates how students progress through their degree programs (full-time, part-

Metric	Definition	Rationale
	from a graduate program as their primary degree. 5-year trend. <i>Data source: UA System Warehouse RPTP/DEDMGR end-of-term freeze files. Disaggregate as per accreditation on an annual basis.</i>	time, stop-out). This information on student behavior and completion can inform program structure and help the institution support students in a way that honors the time needed for rigorous intellectual engagement and growth and also ensures that students can complete in a timely manner.

**9. Do you have any examples of post-graduate success you want to highlight? For example, major scholarships, the percent of students who pass licensure examinations, the percent of students accepted to graduate programs, the percent in post-graduation employment in the field or a related field. (750 characters or less)**

I would like to highlight that the graduates from our BSN program performed well on the National Council Licensure Examination (NCLEX) with a pass rate of 81% from April 2021-March 2022 (94 passed out of 116). This demonstrates that our BSN students are performing along the national average and have shown perseverance in unprecedented times.

Also, 45% of our graduates responded to an employment placement survey following Spring 2022 graduation, and 79.5% of those students reported having employment secured in Alaska. We will continue to assess for employment placement with our upcoming graduates.

---

**DEAN SECTION (Due to the program on January 15)**

*After completing the Dean Section and signing it, the dean should email this form to the program, and copy [uaa\\_oaa@alaska.edu](mailto:uaa_oaa@alaska.edu) for posting. If the program is delivered on one or more community campus, the dean should consult with the appropriate community campus director(s) on the response and copy the appropriate community campus director(s) when emailing the response to the program.*

**1. Based on the program's responses above, what guidance and support do you have for the program moving forward? (750 characters or less)**

The program is commended for retaining a strong pass rate on the NCLEX exam as well as excellent job placement rate in Alaska.

The program did well in identifying one specific PSLO that had room for improvement and describing the process the program went through to integrate a curriculum modification to address that. As the program moves forward in revising its assessment process, it will be beneficial to include a more broad description of the overall assessment process and outcomes from that. It is recognized that the program is putting significant resources into enhancing their assessment process; the college administration will continue to support those efforts.

**2. What is the program doing particularly well in terms of its processes for the assessment and improvement of student learning, for example, the achievement of the Program Student Learning Outcomes, the closing of equity gaps, or addressing the core competencies? (750 characters or less)**

As noted above, there is strength in being able to identify a specific area for improvement and providing evidence of overall faculty involvement to address that area throughout the curriculum. It is also noteworthy that the program has prioritized assessment such that they have engaged with a consultant to work on enhancing their overall assessment process using a methodology specific to their accreditation requirements. The program uses national board exam data as part of their assessment which is a strength in their assessment process.

The program has done well in identifying discipline-specific activities and evaluation methods which promote development of the UAA core competencies.
