

2022 ANNUAL ACADEMIC ASSESSMENT REPORT FORM
(Due October 15 to the dean)

The Faculty Senate Academic Assessment Committee (AAC) is committed to a vision of assessment that leads to continuous program improvements and benefits students. Annual assessment reporting informs decision making and resource allocation aimed at improving student learning and success. It also enables the AAC to analyze assessment across the institution and to respond to UA System, Board of Regents, legislative, and Northwest Commission on Colleges and Universities (NWCCU) requests. We thank you for your continued support of and participation in this annual activity.

Starting in Spring 2021, UAA moved to one academic assessment reporting mechanism. The below form merges and streamlines the former Annual Academic Assessment Survey and the Annual Academic Assessment Report. It also incorporates questions about how academic programs contribute to student achievement of institutional core competencies and to student success.

This annual report will be due to the dean on October 15. Programs with suspended admissions and new programs in the first year of implementation are not required to complete this form.

These reports are public documents and will be posted on the assessment website. Responses are to be narrative only, and must be ADA- and FERPA-compliant. Do not embed any links, including to webpages or other documents. To be FERPA-compliant, do not include the names of any current or former students. Rather, use statements such as, "In AY22 four program graduates were accepted to graduate programs in the field." Programs with specialized accreditation or other external recognitions must comply with restrictions regarding what can be published, as per the accreditor or external organization. Do not include appendices. Appendices to this form will not be accepted.

The form uses narrative, text, and drop-down boxes. Narrative boxes have a character limit, which includes spaces. When using text and drop-down boxes, if you want to undo an answer, press "Control-Z" or "Command-Z."

Note: To ensure the fillable fields function correctly, the form must be completed in Microsoft Word. It will not function properly in Google Docs. Programs that wish to record collaborative discussion of the report might consider creating a separate document to take notes, before entering final responses in the official fillable form.

For technical assistance with this form, email Academic Affairs (uaa.oaa@alaska.edu).

PROGRAM SECTION (Due to the dean on October 15)

After completing the Program Section, the program should email this form to the dean, with a copy to the appropriate community campus director(s) if the program is delivered on a community campus.

Submission date: 10/15/2022

Submitted by: Kathi Trawver, Professor, krtrawver@alaska.edu

Program(s) covered in this report: Social Work BSW

(Programs with suspended admissions and new programs in the first year of implementation are not required to complete this form.)

If you selected "Other" above, please identify. (100 characters or less)

College: College of Health

Campuses where the program(s) is delivered: Anchorage KOD KPC MSC PWSC

Specialized accrediting agency (if applicable): Select Specialized Accrediting Agency or N/A.

If explanation is necessary, such as only some of the certificates and degrees are covered by the specialized accreditation, briefly describe: The UAA BSW Program has been continuously accredited by the Council on Social Work Education since 1978.

INSTITUTIONAL STUDENT LEARNING CORE COMPETENCIES

In 2020, UAA launched a consensus-based, deliberative process to identify the key skillsets that help students achieve academic and post-graduation success. After a year-long process that included students, faculty, staff, administrators, alumni, and employers, the UAA community identified four core competencies at the heart of a quality UAA education. Students develop mastery of these competencies through curricular (e.g., courses), co-curricular (e.g., internships, conferences), and extra-curricular (e.g., student clubs) learning experiences.

After the stakeholder-based process in AY20, UAA is phasing in the integration of the core competencies into ongoing processes, including program student learning outcomes assessment. Personal, Professional, and Community Responsibility (PPCR) was integrated into the AY21 Annual Academic Assessment Report. The AY22 Annual Academic Assessment Report now also integrates Effective Communication.

Question #1 below is designed to engage program faculty in thinking about how they can or already do promote student learning in these two core competencies.

1. **A. *Personal, Professional, and Community Responsibility: The knowledge and skills necessary to promote personal flourishing, professional excellence, and community engagement.***
 - **If last year you provided your program's current or planned example of an intentionally designed course, assignment, or activity that develops and showcases the student learning in this core competency, please discuss that implementation and any observations you have regarding how well it is working. (500 characters or less)**

N/A
 - **If last year you *did not* identify a current or planned example of an intentionally designed course, assignment, or activity that provides students the opportunity to develop and showcase this core competency, please identify one now. (500 characters or less)**

Personal, professional, and community responsibility is a primary component of ethical and professional social work practice, which is a BSW student learning outcome. Thus, this competency is present and assessed in each BSW course and in the overall program assessment.

- B. *Effective Communication: The knowledge and skills necessary to engage in effective communication in diverse contexts and formats.***
 - **What would you hope a student would say if asked where in your program or support service they had the opportunity to develop proficiency in this core competency? (500 characters or less)**

Students would say that effective communication is a primary component of ethical and professional social work practice and is present in each course. As students we learn skills to enable us to demonstrate effective communication skills with vulnerable clients, engage in policy development and advocacy, research, and professional interactions. Further, ethical communication is central to professional social work practice.
 - **Provide your program's current or planned example(s) of an intentionally designed course, assignment, or activity that showcases the student learning in this core competency. (500 characters or less)**

While each course in the BSW program teaches and assesses communication, one example is SWK A330 in which student learn content and skills to effectively engage with clients by learning and practicing interview and empathy/relationship building/motivational enhancement skills through a series of recorded practice interviews that receive supportive peer and instructor support and feedback.

PROGRAM STUDENT LEARNING OUTCOMES

2. Please list the Program Student Learning Outcomes your program assessed in AY22. For each outcome, indicate one of the following: Exceeded faculty expectations, Met faculty expectations, or Did not meet faculty expectations.

In AY21/22 we used two measures for each competency/SLO that each have a respective benchmark (i.e., Field Practicum Instructor Assessment & ACAT-SW national exam). To accommodate this, we use a formula to combine scores and calculate one "Met" or "Failed to Meet" benchmark score for each competency/SLO (i.e., 75% of students demonstrate competence inclusive of two or more measures). Every competency benchmark was exceeded using the FIFAT. However, that ACAT-SW scores varied widely (i.e., 0 to 90th percentile) that lowered the overall performance results significantly.

- Demonstrate ethical and professional behavior - MET
- Engage diversity and difference in practice - EXCEEDED
- Advance human rights and social, economic, and environmental justice - MET
- Engage in practice-informed research and research-informed practice - MET
- Engage in policy practice - FAILED TO MEET
- Engage with individuals, families, groups, organizations, and communities - FAILED TO MEET
- Assess individuals, families, groups, organizations, and communities - FAILED TO MEET
- Intervene with individuals, families, groups, organizations, and communities - FAILED TO MEET
- Evaluate practice with individuals, families, groups, and organizations - FAILED TO MEET

3. Describe your assessment process in AY22 for these Program Student Learning Outcomes, including the collection of data, analysis of data, and faculty (and other, e.g., advisory board) conversations around the findings. (750 characters or less)

Each year, the BSW program assesses each of its program level competencies/student learning outcomes (SLOs) within the explicit curriculum using a standardized national social work exam (ACAT-SW) and an evaluation of demonstration of all SLOs by student's community field supervisors. We also evaluate the implicit curriculum (i.e., the learning environment) via a survey and student climate/exit interviews. All data is collected, analyzed, and reported to faculty by the assessment coordinator. Faculty meet to review and discuss assessment results and identify program, curricular, and course changes we will implement over the coming year. We adhere to a continuous program improvement process model.

4. What are the findings and what do they tell the faculty about student learning in your program? (750 characters or less)

A primary finding from this year's (similar to recent prior years) assessments, is the wide variance in our students abilities and performance in assessment measures. For example, in standardized social curriculum assessment/testing we had students range from the 0 to over 90th percentile when compared to national samples of social work students. However, student scores have turned upward from last year. Areas for improvement are policy and practice. Finally, BSW student consistently perform far higher in the field/actual client practice (as observed by their community field instructors) than in standardized academic testing.

5. **Based on the findings, did the faculty make any recommendations for changes to improve student achievement of the Program Student Learning Outcomes? Please describe the recommended action, what improvement in student learning the program hopes to see with this change, the proposed timeline, and how the program will know if the change has worked. If no recommendations for changes were made, please explain that decision. (750 Characters or less)**

Faculty have not yet fully reviewed and digested the assessment results. However, based on upcoming reaffirmation of accreditation and assessment results, the BSW program faculty will be reviewing all SLOs this fall (2022) and considering needed revisions to the program assessment.

PROGRAM IMPROVEMENTS AND ASSESSING IMPACT ON STUDENT LEARNING

6. **In the past academic year, how did your program use the results of previous assessment cycles to make changes intended to improve student achievement of the Program Student Learning Outcomes? Please check all that apply.**

- Course curriculum changes
- Course prerequisite changes
- Changes in teaching methods
- Changes in advising
- Degree requirement changes
- Degree course sequencing
- Course enrollment changes (e.g., course capacity, grading structure [pass/fail, A-F])
- Changes in program policies/procedures
- Changes to Program Student Learning Outcomes (PSLOs)
- College-wide initiatives (e.g., High-Impact Practices)
- Faculty, staff, student development
- Other
- No changes were implemented in AY22.

If you checked "Other" above, please describe. (100 characters or less)

Change to the BSW program mission, scheduling, class format, and assessment implementation.

7. **Do you have any information about how well these or other past improvements are working? Are they achieving their intended goals? Please include any data or assessment results that help you demonstrate this. (750 characters or less)**

We do see improvements in overall explicit curriculum/SLOs students scores. Additionally, the BSW program also assesses its implicit curriculum (i.e, learning environment). The assessment founds strong student beliefs that the program provides a learning environment that models affirmation and respect for diversity and a supportive and inclusive learning environment; provides information about program policies and strong advising. Students provided many excellent suggestions to strengthen the program further.

STUDENT SUCCESS AND THE CLOSING OF EQUITY GAPS

Student success depends on many aspects of a student's experience. On the academic program level, it can relate to correct placement, course sequencing, standardized pre-requisites across sets of courses, the intentional use of high-impact practices, proactive advising, course scheduling practices, etc.

UAA has selected the below metrics as student success metrics for accreditation.

In response to faculty questions and concerns about reporting on these data without more discussion and training, we will spend AY23 exploring together what equity data are and are not, how they can be used responsibly, and what programs can do to close equity gaps in student achievement on the below metrics, as well as to improve overall student achievement on them. UAA has a team participating in the NWCCU Data Equity Fellowship, and that team will help to guide these conversations.

8. PROGRAMS ARE NOT REQUIRED TO RESPOND TO QUESTION #8 FOR THEIR REPORT DUE ON OCTOBER 15, 2022. IT IS HERE JUST FOR THEIR REFERENCE. Describe the actions your program is taking to improve student achievement on one or more of the following metrics. Also, describe any resulting improvements in student learning.

Metric	Definition	Rationale
UNDERGRADUATE COURSE PASS RATES BY COURSE LEVEL (Undergraduate lower-division, undergraduate upper-division).	The percentage of students who receive a passing grade (A, B, C, P) for all undergraduate students in a course offered by a program compared to the same rate calculated for all courses at that level. Based on a 5-year trend. Included in the denominator for undergraduate courses are the grades D, F, W, I, NP, NB. <i>Data source: RPTP end-of-term freeze files. Disaggregate as per accreditation.</i>	Low pass rates are one critical way to identify courses that are barriers to student success and degree completion. Failing key courses correlates with low retention and more major switching. Mitigation strategies can be internal or external to the course itself, including, among other things, the use of high-impact pedagogical practices, appropriate placement, course sequencing, tutoring, and other means to ensure student success within a particular course. This metric and the disaggregation of the data can inform planning, decision making, and the allocation of resources to programs and services designed to mitigate gaps in achievement and equity.

Metric	Definition	Rationale
ANNUAL RETENTION 1 ST TO 2 ND FALL	Traditional measure of the % of first-time, full-time associate and baccalaureate degree-seeking freshmen who enter in a given fall term and return the following fall. <i>Data source: UA System Warehouse RPTP/DEDMGR end-of-term freeze files. Disaggregate as per accreditation on an annual basis.</i>	Following the student from the 1 st fall to 2 nd fall can indicate ongoing connections and support inside and outside of the classroom are motivating students to return to continue their studies at the institution. Continuing enrollment is a key factor in completion.
SEMESTERS TO DEGREE – GRADUATE PROGRAMS	The average number of semesters taken by students to complete any graduate degree or graduate certificate program. Determined by students who have graduated from a graduate program as their primary degree. 5-year trend. <i>Data source: UA System Warehouse RPTP/DEDMGR end-of-term freeze files. Disaggregate as per accreditation on an annual basis.</i>	Looking at the number of semesters graduate students take to complete their degrees illustrates how students progress through their degree programs (full-time, part-time, stop-out). This information on student behavior and completion can inform program structure and help the institution support students in a way that honors the time needed for rigorous intellectual engagement and growth and also ensures that students can complete in a timely manner.

9. Do you have any examples of post-graduate success you want to highlight? For example, major scholarships, the percent of students who pass licensure examinations, the percent of students accepted to graduate programs, the percent in post-graduation employment in the field or a related field. (750 characters or less)

DEAN SECTION (Due to the program on January 15)

After completing the Dean Section and signing it, the dean should email this form to the program, and copy uaa_oaa@alaska.edu for posting. If the program is delivered on one or more community campus, the dean should consult with the appropriate community campus director(s) on the response and copy the appropriate community campus director(s) when emailing the response to the program.

1. Based on the program's responses above, what guidance and support do you have for the program moving forward? (750 characters or less)

Assessment data continue to show wide variation in student ability and performance, but student achievement has increased in recent years. Students continue to excel in their field practice

experience. Each year, areas for improvement are identified. This year, student performance indicated the need for improvement in policy and practice. Faculty will discuss these results and make recommendations for program improvement.

2. What is the program doing particularly well in terms of its processes for the assessment and improvement of student learning, for example, the achievement of the Program Student Learning Outcomes, the closing of equity gaps, or addressing the core competencies? (750 characters or less)

I thank the program for its adherence to a robust continuous program improvement process model. The model begins with extensive data on program student learning outcomes. The implicit and explicit curriculum are both assessed. The program is able to assess trends over time. Faculty discuss the results and regularly identify opportunities for program improvement. Moving forward, the program will want to assess student success and identify what it can do to close equity gaps in student achievement.
