

- GG&A's final report observations and recommendations

Provost Runge

- Enrollment Update
 - Colleges shared information that their advising teams have gathered about student interest in face-to-face versus virtual courses.
- Campus Reopen Plans
 - College deans will work together to figure out which types of positions need on-campus work, i.e. advising, building managers, etc.
- Community Campus Coordination
 - It is imperative that we all work together toward better communication between the campuses. Please work with your staff, faculty, and chairs to positively impact the narrative going forward. The Community Campuses are a valuable part of UAA and both sides need one another.
 - Going forward, the Provost will form a fall semester task force to work out a shared model for online GER course scheduling, and she expects the deans to keep working to find ways to include and collaborate with community campus-based faculty.
