Entry Level Mine Geologist/Geologic Drilling Intern

Responsible for assisting and carrying out a full range of geologic functions associated with exploration drilling. Duties will include maintaining accurate drilling records, supervising the collection of samples, field logging of drill cuttings, supervising drill rig setup, logging of drill core and other duties as assigned.

Successful applicant must have completed at least two years on a mining or geologic degree at an accredited university and have successfully completed courses in mineralogy, petrology, and structural geology. Applicants must possess a valid driver’s license, be capable of passing a pre-employment physical, drug screen and criminal background check and be willing to work in adverse weather conditions.

This position is located on a mine site near Fairbanks. Interested parties should be aware that employees will be responsible for housing, meals and transportation to and from site. There is no relocation allowance.

The deadline for this job is December 28th. Please apply online at Geotemps.com and email a resume, cover letter, and three professional references to Jen Wieland at jwieland@geotemps.com
