

CROWDFUNDING

Scope

This policy applies to crowdfunding activities associated with the University of Alaska Anchorage (UAA Companies). The policy applies to all UAA employees, affiliate faculty, and students.

Definitions

A UAA startup company is a company that was started by UAA employees, affiliate faculty, and students to commercialize intellectual property resulting from UAA research.

Policy Statement

UAA is in the process of developing policy and guidance related to the use of crowdfunding for projects and startups. Until this is in place we ask that no such funding is sought with the following exception.

UAA startups may seek crowd funding if approved by both Seawolf Holdings and the Vice Provost for Research and Graduate Studies.

Crowdfunding activities must use approved sites for crowdfunding. A list will be available from the ORGS.

Non-Compliance: UAA will develop penalties for non-compliance.
