

Data Management Policy

Policy Statement

The purpose of this policy is to ensure that all proposals submitted by the University of Alaska Anchorage (UAA) to sponsors for funding are compliant with the data management requirements of the external funding agency to which the proposal is being submitted.

Data Management

Each external funding agency has its own specific requirements for data management (see links below), so there is no uniform guidance that can be endorsed by UAA. Therefore, each Principal Investigator is responsible for consulting the appropriate external funding agency policy and Data Management Plan (DMP) guidelines prior to submitting a proposal to the Office of Sponsored Programs.

Data Management Plan

To insure that a proposed DMP adheres to sponsor requirements, Principal Investigators are encouraged to utilize the publically available Data Management Plan Tool at <https://dmptool.org/> which contains open source DMP templates for various funding agencies and institutions, as well as DMPs submitted by individuals. The templates are regularly updated to reflect the latest sponsor requirements.
